Yağmur Selek, Frontend

Yiğit Sarioğlu, Frontend

1. Executive Summary

1.1. Status of Deliverables

All deliverables listed below are completed. Completion date implies the date of the last change made on them.

DELIVERABLE	STATUS	COMPLETION DATE
Software Requirements Specification (SRS)	COMPLETED	09.05.2021
Software design documents (using UML)	COMPLETED	09.05.2021
User scenarios and mockups	COMPLETED	27.04.2021
Project plan	COMPLETED	21.10.2021
Milestone reports	COMPLETED	07.01.2022
Manuals	COMPLETED	
User Manual	COMPLETED	12.01.2022
System Manual	COMPLETED	07.01.2022

1.2. Status of All Requirements

SRS req.num.	Requirements	Backend	Frontend	Android
	<u>-Functional Requirements-</u>			

	-User Requirements			
	Sign in/up			
3.1.1.1.1.	User shall include his/her name, username, password, e-mail during sign-up.	Completed	Completed	Completed
	Profile			
3.1.1.2.1.	User shall have interests with skill level, location, age and public badges shown on profile.	Completed	Completed	Completed
3.1.1.2.2.	User shall be able to see the private activity history.	In progress	Not Started	Not Started
3.1.1.2.3.	User shall be able to follow other users.	Not Started	Not Started	Not Started
3.1.1.2.4.	User shall be able to get notifications of the events that the users they follow create.	In progress	Not Started	Not Started
	Settings			
3.1.1.3.1.	User shall be able to delete his/her account.	Completed		Not Started
3.1.1.3.2.	User shall be able to customize notifications	Not Started	Not Started	Not Started
	Creating Events			
3.1.1.4.1.	Any user shall be able to create events.	Completed	Completed	Completed

3.1.1.4.2.	Event creator shall provide location, date, duration, and type of an event when creating an event.	Completed	Completed	Completed
3.1.1.4.3.	Type of an event shall include its name, rules, number of people needed, required equipment, skill level.	In Progress	In Progress	In Progress
3.1.1.4.4.	If the desired type cannot be found, user shall be able to use characteristics to define an event.	Completed	Completed	Completed
3.1.1.4.5.	Event creator shall be able to check the appliers' badges or related information for whether to accept them or not.	Completed	Completed	Completed
3.1.1.4.6.	Event creator shall select the attendees out of appliers.	Completed	Not Started	Not Started
3.1.1.4.7.	Event creator shall be able to create and give out badges to attendees.	Completed	Completed	Completed
	Searching and Attending an Event			
3.1.1.5.1.	User shall provide at least 3 kinds of sports and skill level for searching.	In Progress	Not Started	Not Started
3.1.1.5.2.	User shall be able to search by location, date, type, people, skill level.	In Progress	In Progress	In Progress
3.1.1.5.3.	User shall be able	In Progress	Not Started	In Progress

	to apply to participate in or spectate an event.			
3.1.1.5.4.	User shall be informed on whether he/she was accepted to the event.	In Progress	Not Started	Not Started
3.1.1.5.5.	After the event, user shall be able to give badges defined by event creators to other people.	Completed	Completed	Completed
3.1.1.5.6.	Event creator shall be able to contact system maintainers for desired badge inclusion.	Not Started	Not Started	Not Started
3.1.1.5.7.	User shall be able to comment on the event page.	Completed	Completed	Completed
	Buying Products and Other Services			
3.1.1.6.1.	User shall be able to search for equipment sales by sport and location.	In Progress	In Progress	In Progress
3.1.1.6.2.	User shall be able to check information of equipment sellers and read descriptions written by them.	Completed	Completed	Completed
3.1.1.6.3.	User shall be able to create equipment sale posts that include its description.	Completed	Completed	Completed
	-System Requirements-			
	Sign in/up			

3.1.2.1.1.	The system shall provide users with options to create a new account or sign-in to an existing.	Completed	Completed	Completed
3.1.2.1.2.	The system shall allow users to enter information about the kinds of sports they are interested in and their skill level while they are signing up.	Completed	Completed	Completed
3.1.2.1.3.	The system should allow users to recover their password by sending a password-recovery e-mail.	Not Started	Not Started	Not Started
3.1.2.1.4.	The system shall verify the entered information before creating an account for registering users. Users who provide invalid information should not be allowed to create an account.	In Progress	In Progress	In Progress
	Search			
3.1.2.2.1.	The system shall allow users to search for events, according to event name, location, sport, date.	In Progress	In Progress	In Progress
3.1.2.2.2.	The system shall allow users to search for other users and view their location, schedule and interests if they	Not Started	Not Started	In Progress

	have provided such information.			
3.1.2.2.3.	The system shall allow users to search for other users by name, view their profile and follow other users.	In Progress	In Progress	In Progress
3.1.2.2.4.	The system shall allow users to search for equipment for any sport they are interested in	Completed	Not Started	Completed
	Events			
3.1.2.3.1.	The system shall provide information about the events such as event name, location, date, sport and the number of players.	Completed	Completed	Completed
3.1.2.3.2.	The system shall maintain and provide analysis information about the events.	Not Started	Not Started	Not Started
3.1.2.3.3.	The system shall allow users to request joining an event.	Completed	Completed	Completed
3.1.2.3.4.	The system shall allow users to create events by specifying event name, location, date, sport and the number of players.	Completed	Completed	Completed
3.1.2.3.5.	The system shall provide default sport types for the event creators to select	Not Started	Not Started	Not Started

	from.			
3.1.2.3.6.	If no matching sports type exist, the system shall allow event creators to specify the event characteristics.	In progress	In progress	In progress
3.1.2.3.7.	The system shall send a pop-up message after a user creates an event.	Completed	Completed	Completed
3.1.2.3.8.	The system shall allow users to cancel events they have created.	Completed	Not Started	Completed
	Recommendations			
3.1.2.4.1.	The system shall recommend users events based on their location and sports they are interested in.	Not Started	Not Started	Not Started
3.1.2.4.2.	The system shall recommend event creators other users based on their location, interests and schedules.	Not Started	Not Started	Not Started
3.1.2.4.3.	The system shall recommend sport-related content(gadgets, clothing, tools, merchandise) to users for the sports they are interested in.	Not Started	Not Started	Not Started
	Notifications			
3.1.2.5.1.	The system shall send notifications to event creators when	In Progress	Not Started	Not Started

	a user sends a request to one of their events.			
3.1.2.5.2.	The system shall send notifications to users who are accepted or rejected for that event.	In Progress	Not Started	Not Started
3.1.2.5.3.	The system shall send notifications to users when one of the users they are following creates an event.	In Progress	Not Started	Not Started
	Badges			
3.1.2.6.1.	The system shall allow users to give badges to others users who they have joined an event together with.	Completed	Completed	Completed
3.1.2.6.2.	The system shall allow event creators to give badges to users who have participated in their events.	Completed	Completed	Completed
3.1.2.6.3.	The system shall provide a default selection of badges.	Completed	Completed	Completed
3.1.2.6.4.	The system should allow users to make requests for new badge types they would like to see available.	Not Started	Not Started	Not Started
	Interactions			
3.1.2.7.1.	The system shall allow users to block other users.	Not Started	Not Started	Not Started
3.1.2.7.2.	The system shall	Not Started	Not Started	Not Started

	not allow users to view other users profiles who have blocked them.			
3.1.2.7.3.	The system should allow users to leave comments on the events they have participated in.	Completed	Not Started	Completed
	<u>-Nonfunctional Requirements-</u>			
	Availability			
3.2.1.1.	The system shall run as a web application, available through modern web browsers & an Android application.	Completed	Completed	Completed
3.2.1.2.	Cross-platform languages shall not be used implementing the system.	In Progress	In Progress	In Progress
3.2.1.3.	The system language shall be English.	Completed	Completed	Completed
	Standards			
3.2.2.1.	The system shall follow W3C Activity Stream Standard 2.0 to implement subscriptions & notifications	Completed	In Progress	In Progress
3.2.2.2.	The semantic taggings should be supported with Wikidata.	Completed	In Progress	In Progress
	Privacy			
3.2.3.1.	Users shall accept a	Not Started	Not Started	Not Started

	privacy policy during a sign-up, setting permissions on personal data.			
3.2.3.2.	Users should be able to block each other, further specifying who can see their data.	Not Started	Not Started	Not Started
3.2.3.3.	Users shall not be asked to grant any information besides than a name & an e-mail address.	In Progress	In Progress	Completed
3.2.3.4.	Data should be extracted out of what users share and allow to be visible, to analyze statistically and optimize user experience.	Not Started	Not Started	Not Started
3.2.3.5.	User data shall be stored and processed according to General Data Protection Regulation(GDPR) and KVKK.	Not Started	Not Started	Not Started
	Security			
3.2.4.1.	Users shall not be able to track transaction history of other users.	Completed	In Progress	In Progress
3.2.4.2.	System shall not be accessible through old versions of browsers.	Not Started	Not Started	Not Started
3.2.4.3.	E-mail and password info for users shall be encrypted before	Completed	Completed	Completed

	storage.			
3.2.4.4.	No user shall be granted admin permissions.	Completed	Completed	Completed

Final Release Notes

Deployed version of our web application can be accessed at <http://ec2-18-216-171-234.us-east-2.compute.amazonaws.com:3000/>

The backend is served from <http://3.67.188.187:8000/api/>

Instructions for building and running the application locally with the database dump was included in the earlier submission.

Changes planned/implemented to improve the development process

With the feedback from the previous demo, our goal for the final demo was to get badges and equipment market working. Additionally, we wanted to provide something specific for each sport type and decided on providing direct link to sport specific equipments from the event page.

Final Project Evaluations

Due to the limited time we've had, we believe our final delivery was a bit lower than the standard we were aiming for. We have had many last minute issues popping up and we once again realized the importance of proper planning and organization in the software development process. Nevertheless, we are happy with what we have presented and put together and many of us are walking away from these series of courses with experience and a newly found appreciation for software development.

2. Summary of Coding Work

BACKEND

TEAM MEMBER	CONTRIBUTION
-------------	--------------

Tolga Kerimoğlu	<ul style="list-style-type: none"> - Fixed a bug reported by the android team where the event update endpoint did not update certain fields. Tracked down the cause to be an oversight in the custom serializer I created for the events. - Implemented search functionalities for events based on sport type, creator and skill level. - Implemented badges. Decided upon 8 badges by browsing Wikidata. Documented the relevant endpoints and usage. - Noticing certain points missing with the current equipment API, I have recreated it for use in the final demo. Additionally implemented the search functionality where one can search equipments related to a single sport type. - Wrote the executive summary and the API documentation for the Final Milestone Report. - Created a thorough POSTMAN collection in addition to the documentation we already have so that frontend/android teams can work smoother. POSTMAN became the main tool of API documentation overall. - Put together releases, uploaded final builds to dockerhub for easy deployment of the application and created the deployment tutorial as part of the first submission. Tried to make the deploy very easy with minimal command running and independent of source code by using dockerhub. - Planned the outline of the demo, what to present etc. Also presented the web demo.
İrfan Bozkurt	
Mehmet Hilmi Dünder	<ul style="list-style-type: none"> - Attended weekly group meetings - Learned and used Postman for developing and documenting - Implemented equipment post api (providing get, get list, delete, patch, post methods) and merged to backend-dev-hilmi branch - Implemented equipment api unit tests to validate implemented equipment api and merged to backend-dev-hilmi branch - Documented equipment api with realistic

	<p>examples and merged to backend-dev-hilmi branch</p> <ul style="list-style-type: none"> - Contributed to creating realistic user data, equipment post data, and event post data for submitted database

FRONTEND

TEAM MEMBER	CONTRIBUTION
Yiğit Sarioğlu	<ol style="list-style-type: none"> 1. Implemented the “Sell Equipment”, “Find Equipment page”, “Showing Badges in User Profile”, “Image/File Upload functionality”. 2. Implemented File Upload/Image Upload by Axios in React. Files/Images are stored in cloud service. I created an account on cloudinary, uploaded files here. Then I took the links and sent them to the backend service. 3. Implemented Equipment Cards and UserCards. 4. Attended weekly group meetings and sub-group meetings 5. Opened a page on the wiki (github) for the React JS- Documented the React and frontend side 6. Used the documentation prepared by the backend team to access to the API endpoints 7. Used POSTMAN to test the API endpoints 8. Did a pair-programming session before the demo night
Yağmur Selek	<ol style="list-style-type: none"> 1. Implemented the Comment Functionality for the Event Detail Page. 2. Implemented the give Badge functionality to the User Profile Page 3. Created equipment posts and Event posts for the domination of the database. 4. Attended weekly group meetings. 5. Used the documentations for Reactjs and the API. 6. Used postman to test the APIs endpoints. 7. Did the pair-programming before the demonight. 8. Created the User Manual and added the

	system manual to the wiki.
Ali Alperen Durak	<ol style="list-style-type: none"> 1. Created an event detail page to show event information, comments. Users can also apply the events via this page. 2. Created the user profile page mostly the same as the user's own profile page. When users click another user's name they show the profile page of clicked user. 3. Made users' names and sport types clickable. When users click the sport type they are navigated to the filtered equipment page for related sport type, when they click the users' names they are navigated to the clicked user's profile page. 4. Implemented the apply functionality for events in the event detail page. I used the update event endpoint. 5. Implemented the comment list component to show events' comments made by users. It is listed in the event detail page. 6. Implemented the filtering by sport type for equipment when the user clicks the sport type in the event detail page. 7. Implemented the autocomplete functionality via using google api for location input in the sell equipment page. 8. Implemented the event list component in the user profile page to show events which user is participating. 9. Implement hot reload functionality to comment addition, badge giving and listing after event apply. 10. Made docker hub implementation for frontend code to easy deployment. 11. Participated in task planning and feature review meetings before the demo. In the review meeting before the demo night some bug fixes and feature additions were implemented. 12. Made final deployment frontend code to aws before the customer presentation.

ANDROID

TEAM MEMBER	CONTRIBUTION
-------------	--------------

Fatih Akgöz	<ol style="list-style-type: none"> 1. Filter options for events. Filter by creator, sport type or skill level. 2. Creating equipment function. 3. Display all equipments function. 4. Filter equipment by creator function. 5. View related events function. 6. Received Ece's pull requests. 7. Presented the Android Demo. 8. Created system manual for Android application with Ece. 9. I joined the meetings of the Android Task Force. 10. Created user manual for mobile application with Ece. 11. Added Android User Interfaces to report with Ece.
Ece Dilara Aslan	<ol style="list-style-type: none"> 1. Attended Android and weekly group meetings. 2. Studied SharedViewModel and Spinner in Kotlin. 3. Implemented comment list functionality. 4. Implemented add comment functionality. 5. Implemented delete event functionality. 6. Implemented update event functionality. 7. Created profile page with upcoming events, applied events and badges. 8. Implemented search profile by username functionality. 9. Implemented give badge functionality. 10. Implemented log out functionality. 11. Fixed the issue of create and update event information deletion when the map is opened for selecting a location. 12. Fixed the issue of updating comments when a new comment is created. 13. Fixed the issue of updating badges when a new badge is given. 14. Reviewed Fatih's pull requests. 15. Created a scenario of Android application for customer demo 3. 16. Created system manual for Android application with Fatih. 17. Wrote Android meeting notes of this semester. 18. Created user manual for Android application with Fatih. 19. Added Android User Interfaces to report with Fatih.

3. Group Specific Core Functionality

3.1 Android Application

3.1.1 Search Events by Sports Type

Raul searches for an Ultimate Frisbee event by using this functionality.

- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventFragment.kt>
- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventViewModel.kt>
- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventAdapter.kt>
- https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/search_event_dialog.xml
- https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/fragment_event.xml
- https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/event_item.xml

3.1.2 Apply to Event

Raul applies to an Ultimate Frisbee event that he likes.

- https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/event_detail_fragment.xml
- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventDetailFragment.kt>
- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventDetailViewModel.kt>

3.1.3 List Events

Raul views all events and looks for an event that is close to his hotel.

- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventFragment.kt>
- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventViewModel.kt>
- <https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/java/com/example/sportshub/event/EventAdapter.kt>
- https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/fragment_event.xml
- https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/event_item.xml

3.1.4 Search Profile

Raul's sport buddies view Raul's profile to see Raul's sporting adventures by looking at his badges.

- <https://github.com/bounswe/2021SpringGroup4/tree/android-main/app/src/main/java/com/example/sportshub/profile>

3.2 Frontend Application

3.2.1 Search Events by Their Location (Map Functionality)

He wants to find an Ultimate Frisbee Game while he is on a business trip to Bangkok Thailand while staying at Marsi Hotel (13.684648503073534, 100.61400132846666).

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/pages/SearchEvents.js>

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/pages/EventDetail.js>

3.2.2 Apply to Event

Raul applies to an Ultimate Frisbee event that he likes.

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/components/EventListDetail.js>

3.2.3 List Events

Raul views all events and looks for an event that is close to his hotel.

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/components/EventList.js>

3.2.4 Search Profile

Raul's sport buddies view Raul's profile to see Raul's sporting adventures by looking at his badges.

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/pages/UserProfile.js>

4. Standards

W3C activity stream standards: There is an activity handler module that creates formatted data representations anytime a defined event is triggered. This data is then used for communication between different backend apps. A more detailed view can be found in the related issue:

<https://github.com/bounswe/2021SpringGroup4/issues/176>

Wikidata: Our badges are extracted from Wikidata. You can find the matching in the related issue: <https://github.com/bounswe/2021SpringGroup4/issues/184>

5. API

Link: <http://3.67.188.187:8000/api/docs/>

Additional Documentation:

<https://github.com/bounswe/2021SpringGroup4/blob/backend-main/code/README.md>

You can find the available endpoints in the POSTMAN collection:

<https://www.getpostman.com/collections/fcba76c7f8264873047b>

Most API endpoints run with JWT authentication. You need to register and then login and append the access token you receive as a Bearer token for requests to other endpoints.

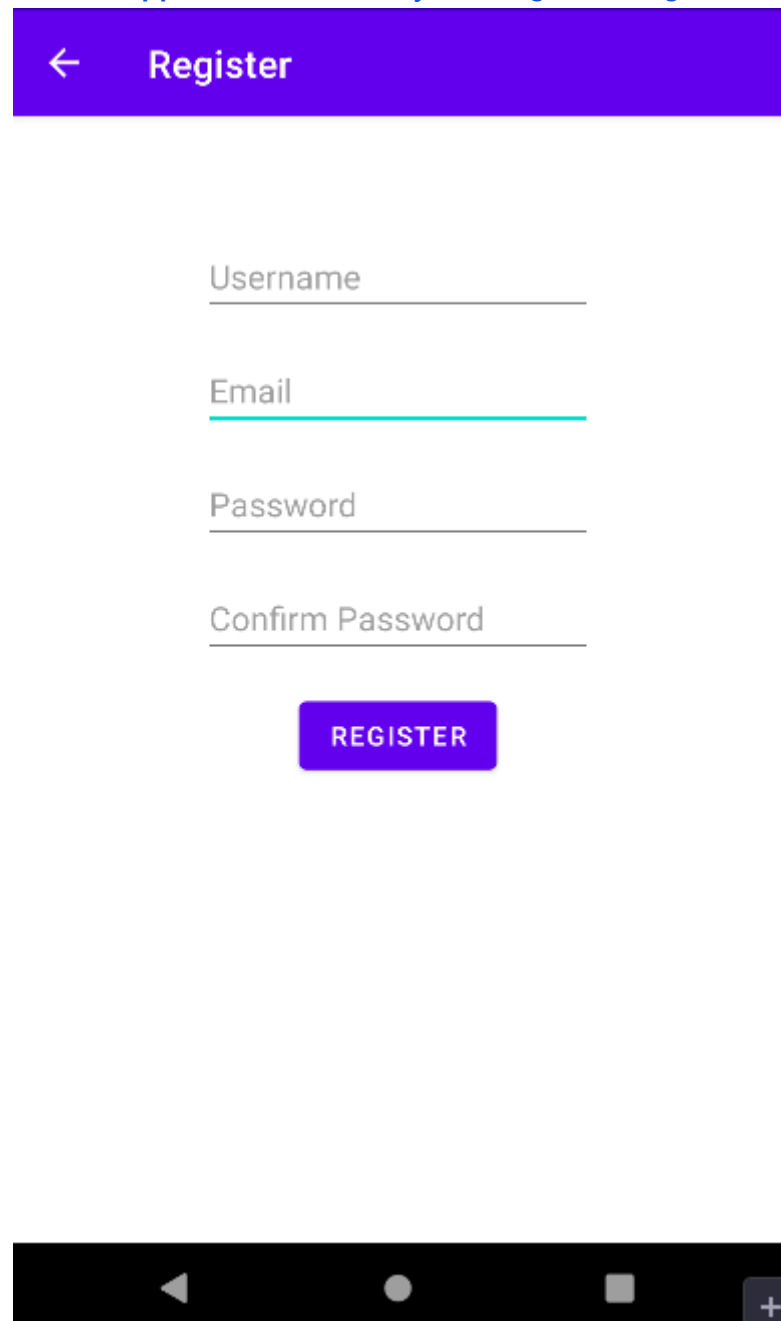

6. User Interfaces

6.1. Android Interfaces

6.1.1. Register Page

Link:

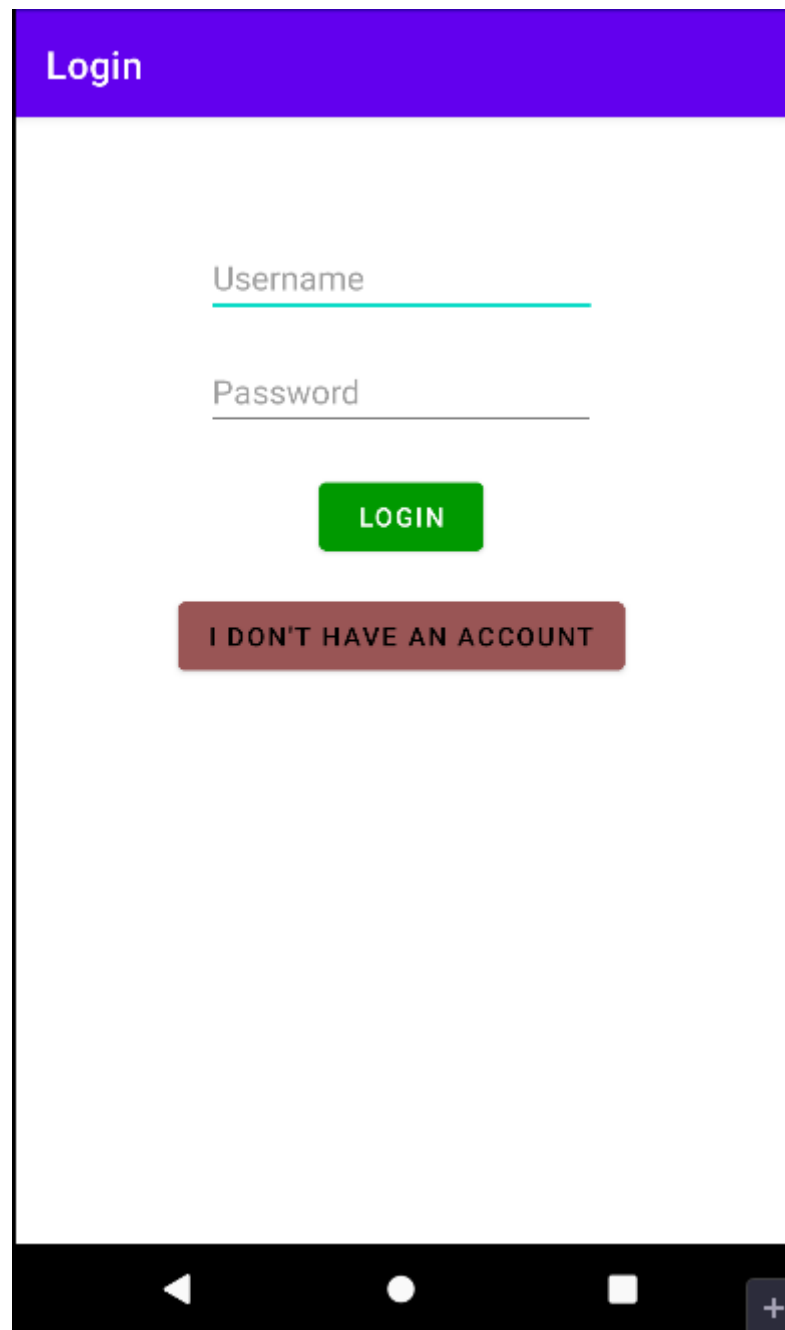

https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/fragment_register.xml

The screenshot displays the 'Register' page of an Android application. At the top, there is a purple header bar with a white back arrow icon and the text 'Register'. Below the header, the page has a white background. It features four text input fields, each with a light gray placeholder label: 'Username', 'Email', 'Password', and 'Confirm Password'. The 'Email' field is currently active, indicated by a red underline. Below these fields is a purple button with the text 'REGISTER' in white. At the bottom of the screen, there is a black Android navigation bar with standard icons for back, home, and recent apps, along with a small '+' icon on the right.

6.1.2. Login Page

Link: https://github.com/bounswe/2021SpringGroup4/blob/android-main/app/src/main/res/layout/fragment_login.xml

6.1.3. List Event Page

6.2. Web Interfaces

6.2.1. Register Page

Link to Code in project repository:

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/pages/Register.js>

Screenshot:

The screenshot displays the SportsHub website's registration page. The top navigation bar is dark with the SportsHub logo and links for 'About Us', 'Contact', 'Explore Events', and 'Register'. Below the navigation bar, there is a light blue banner with a 'Home | Register' link. The main content area features a white 'Create Account' form centered on a teal background. The form includes input fields for 'First Name', 'Username', 'Email', and 'Password', a green 'Create Account' button, and a link for users who 'Already Have an Account?' to 'Login'.

6.2.7. Sell Equipment Page

Link to Code in project repository:

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/pages/EquipmentCreator.js>

The screenshot shows the 'Sell Your Equipment' page in the SportsHub application. The page has a dark header with the 'SportsHub' logo and navigation links: 'Create Event', 'Explore Events', and 'Sell Equipment'. Below the header, there are links for 'Home' and 'Logout'. The main content area has a blue background with the title 'Sell Your Equipment'. On the right side, there is a box labeled 'Add Image' containing a placeholder for a profile picture and two buttons: 'Choose Photo' and 'Upload Image'. Below this, there is a form with two columns of input fields. The left column has fields for 'Title', 'Description', 'Location', 'Contact', and 'Sport Type'. The right column has fields for 'Title', 'Description', 'Enter Location', 'Contact', and 'Sport Type'. At the bottom left of the form, there is a 'Create' button.

6.2.9. Edit User Profile Page

Link to Code in project repository:

<https://github.com/bounswe/2021SpringGroup4/blob/master/code/frontend/src/pages/EditUserProfile.js>

The screenshot displays a web interface for updating a user profile. At the top, there is a teal header with a light blue box containing the text "Add your Image" and a placeholder for a profile picture. Below this box are two buttons: "Choose your Photo" and "Upload Image". The main form consists of two columns of input fields. The left column has labels "First Name", "Last Name", "Age", "About", and "Location". The right column has corresponding input fields, with "First Name" and "Last Name" containing placeholder text. At the bottom left of the form is a dark grey button labeled "Update Profile".

- Run the application in the emulator.

7.2. Web App/Frontend

System requirement: Linux, Windows or MacOS operating system and a browser

Requirement: You need to install Node.js before you run the following scripts. Your Node.js version must be above 5.0.0.

a) Normal Installation to localhost

- Pull the repository.
- Install Node.js.
- Checkout branch frontend-main.
- Open the terminal and change the current directory as code->frontend.

- On the terminal run "npm install"
(This installs all the packages in package.json.)
- Run the application with the command "npm start"
(This runs the app in the development mode. You can open <http://localhost:3000> to view the app in the browser. The page will reload if you make any changes in the code.)
- To run tests, you need to run the command "npm test" . This runs the provided package's "test" script.

b) Installation with DockerFile

- Pull the repository
- Open the terminal and change the current directory as code->frontend.
- On the terminal run "docker-compose build"
- On the terminal run "docker-compose up"

9. Software Requirement Specification

3.1 Functional Requirements

3.1.1 User Requirements

3.1.1.1 Sign in/up

- 3.1.1.1.1 User shall include his/her name, username, password, e-mail during sign-up.

3.1.1.2 Profile

- 3.1.1.2.1 User shall have interests with skill level, location, age and public badges shown on profile.
- 3.1.1.2.2 User shall be able to see the private activity history.
- 3.1.1.2.3 User shall be able to follow other users.
- 3.1.1.2.4 User shall be able to get notifications of the events that the users they follow create.

3.1.1.3 Settings

- 3.1.1.3.1 User shall be able to delete his/her account.
- 3.1.1.3.2 User shall be able to customize notifications.

3.1.1.4 Creating events

- 3.1.1.4.1 Any user shall be able to create events.
- 3.1.1.4.2 Event creator shall provide location, date, duration, and type of an event when creating an event.
- 3.1.1.4.3 Type of an event shall include its name, rules, number of people needed, required equipment, skill level.
- 3.1.1.4.4 If the desired type cannot be found, user shall be able to use characteristics to define an event.
- 3.1.1.4.5 Event creator shall be able to check the appliers' badges or related information for whether to accept them or not.
- 3.1.1.4.6 Event creator shall select the attendees out of appliers.
- 3.1.1.4.7 Event creator shall be able to create and give out badges to attendees.

3.1.1.5 Searching and attending an event

- 3.1.1.5.1 User shall provide at least 3 kinds of sports and skill level for searching.
- 3.1.1.5.2 User shall be able to search by location, date, type, people, skill level.
- 3.1.1.5.3 User shall be able to apply to participate in or spectate an event.
- 3.1.1.5.4 User shall be informed on whether he/she was accepted to the event.
- 3.1.1.5.5 After the event, user shall be able to give badges defined by event creators to other people.
- 3.1.1.5.6 Event creator shall be able to contact system maintainers for desired badge inclusion.
- 3.1.1.5.7 User shall be able to comment on the event page.

3.1.1.6 Buying products and other services

- 3.1.1.6.1 User shall be able to search for equipment sales by sport and location.
- 3.1.1.6.2 User shall be able to check information of equipment sellers and read descriptions written by them.
- 3.1.1.6.3 User shall be able to create equipment sale posts that include its description.

3.1.2 System Requirements

3.1.2.1 Sign in/up

- 3.1.2.1.1 The system shall provide users with options to create a new account or sign-in to an existing.

- 3.1.2.1.2 The system shall allow users to enter information about the kinds of sports they are interested in and their skill level while they are signing up.
- 3.1.2.1.3 The system should allow users to recover their password by sending a password-recovery e-mail.
- 3.1.2.1.4 The system shall verify the entered information before creating an account for registering users. Users who provide invalid information should not be allowed to create an account.

3.1.2.2 Search

- 3.1.2.2.1 The system shall allow users to search for events, according to event name, location, sport, date.
- 3.1.2.2.2 The system shall allow users to search for other users and view their location, schedule and interests if they have provided such information.
- 3.1.2.2.3 The system shall allow users to search for other users by name, view their profile and follow other users.
- 3.1.2.2.4 The system shall allow users to search for equipment for any sport they are interested in.

3.1.2.3 Events

- 3.1.2.3.1 The system shall provide information about the events such as event name, location, date, sport and the number of players.
- 3.1.2.3.2 The system shall maintain and provide analysis information about the events.
- 3.1.2.3.3 The system shall allow users to request joining an event.
- 3.1.2.3.4 The system shall allow users to create events by specifying event name, location, date, sport and the number of players.
- 3.1.2.3.5 The system shall provide default sport types for the event creators to select from.
- 3.1.2.3.6 If no matching sports type exist, the system shall allow event creators to specify the event characteristics.
- 3.1.2.3.7 The system shall send a pop-up message after a user creates an event.
- 3.1.2.3.8 The system shall allow users to cancel events they have created.

3.1.2.4 Recommendations

- 3.1.2.4.1 The system shall recommend users events based on their location and sports they are interested in.
- 3.1.2.4.2 The system shall recommend event creators other users based on their location, interests and schedules.

- 3.1.2.4.3 The system shall recommend sport-related content(gadgets, clothing, tools, merchandise) to users for the sports they are interested in.

3.1.2.5 Notifications

- 3.1.2.5.1 The system shall send notifications to event creators when a user sends a request to one of their events.
- 3.1.2.5.2 The system shall send notifications to users who are accepted or rejected for that event.
- 3.1.2.5.3 The system shall send notifications to users when one of the users they are following creates an event.

3.1.2.6 Badges

- 3.1.2.6.1 The system shall allow users to give badges to others users who they have joined an event together with.
- 3.1.2.6.2 The system shall allow event creators to give badges to users who have participated in their events.
- 3.1.2.6.3 The system shall provide a default selection of customizable badges.
- 3.1.2.6.4 The system should allow users to make requests for new badge types they would like to see available.

3.1.2.7 Interactions

- 3.1.2.7.1 The system shall allow users to block other users.
- 3.1.2.7.2 The system shall not allow users to view other users profiles who have blocked them.
- 3.1.2.7.3 The system should allow users to leave comments on the events they have participated in.

3.2 Nonfunctional Requirements

3.2.1 Availability

- 3.2.1.1 The system shall run as a web application, available through modern web browsers & an Android application.
- 3.2.1.2 Cross-platform languages shall not be used implementing the system.
- 3.2.1.3 The system language shall be English.

3.2.2 Standards

- 3.2.2.1 The system shall follow W3C Activity Stream Standard 2.0 to implement subscriptions & notifications
- 3.2.2.2 The **semantic taggings** should be supported with **Wikidata**.

3.2.3 Privacy

- 3.2.3.1 Users shall accept a privacy policy during a sign-up, setting permissions on personal data.
- 3.2.3.2 Users should be able to block each other, further specifying who can see their data.
- 3.2.3.3 Users shall not be asked to grant any information besides than a name & an e-mail address.
- 3.2.3.4 Data should be extracted out of what users share and allow to be visible, to analyze statistically and optimize user experience.
- 3.2.3.5 User data shall be stored and processed according to **General Data Protection Regulation(GDPR)** and **KVKK**.

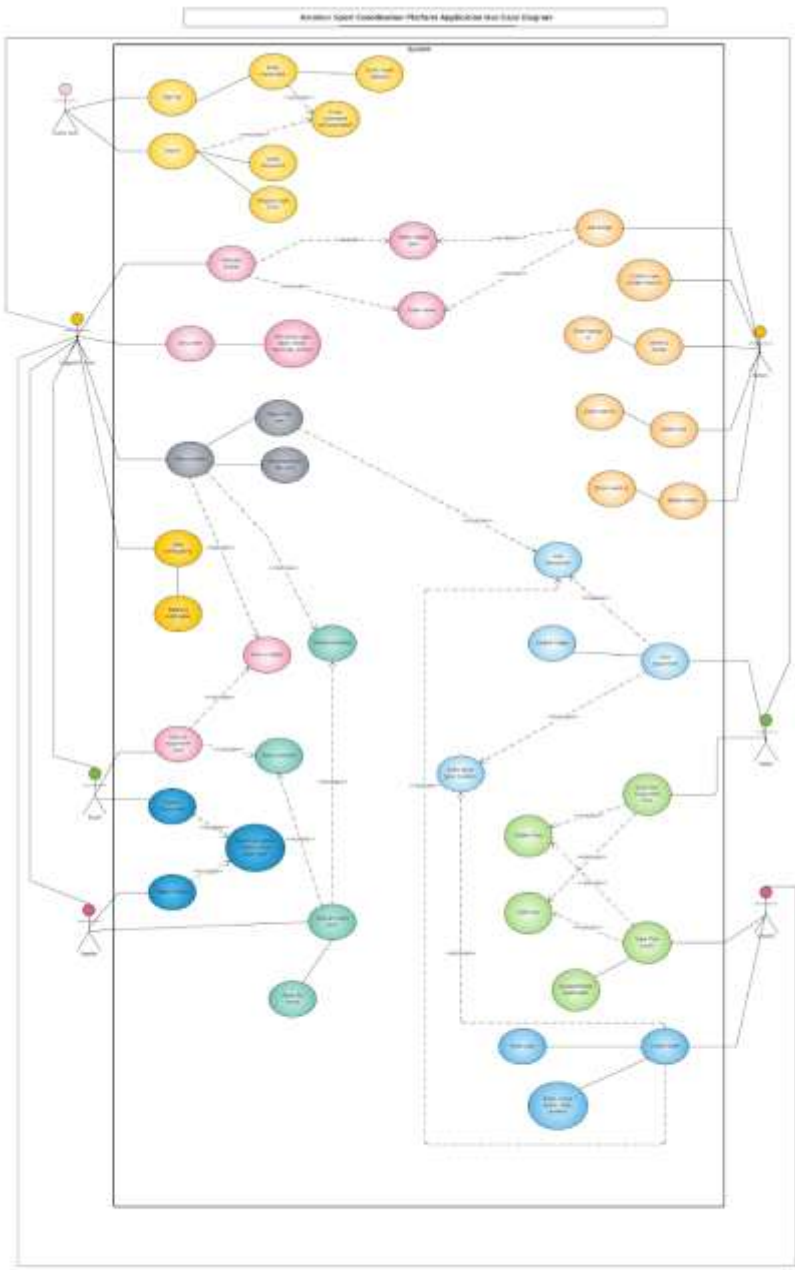

3.2.4 Security

- 3.2.4.1 Users shall not be able to track transaction history of other users.
- 3.2.4.2 System shall not be accessible through old versions of browsers.
- 3.2.4.3 E-mail and password info for users shall be encrypted before storage.
- 3.2.4.4 No user shall be granted admin permissions.

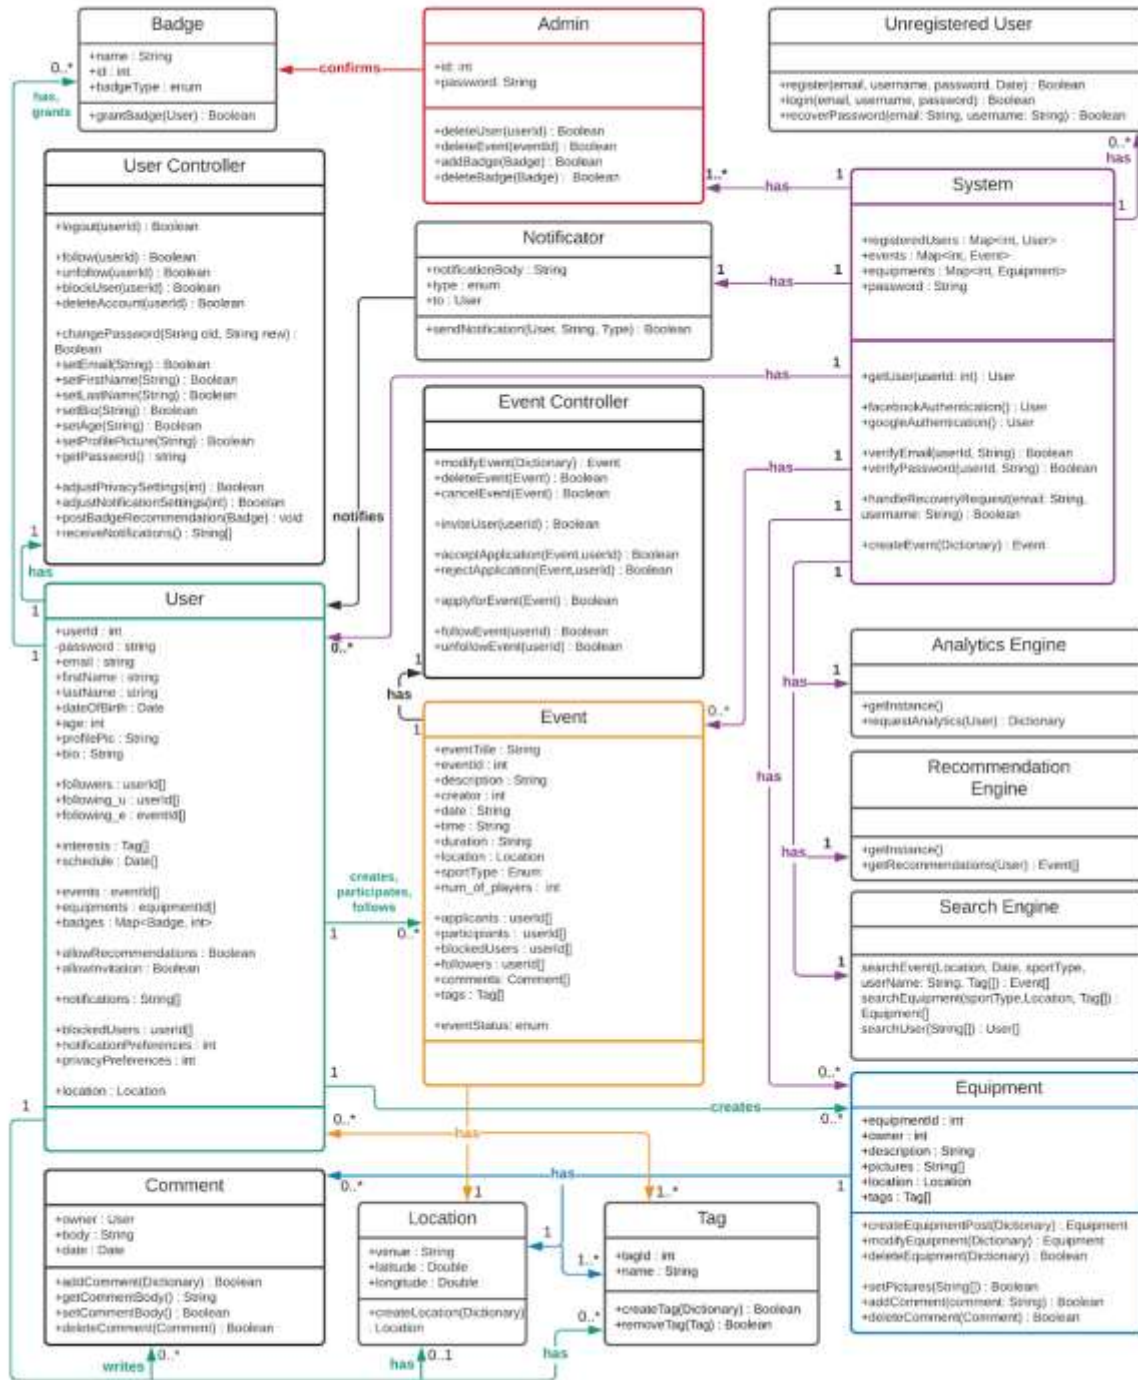

10. Software Design Documents

UML Diagrams

Use Case Diagram

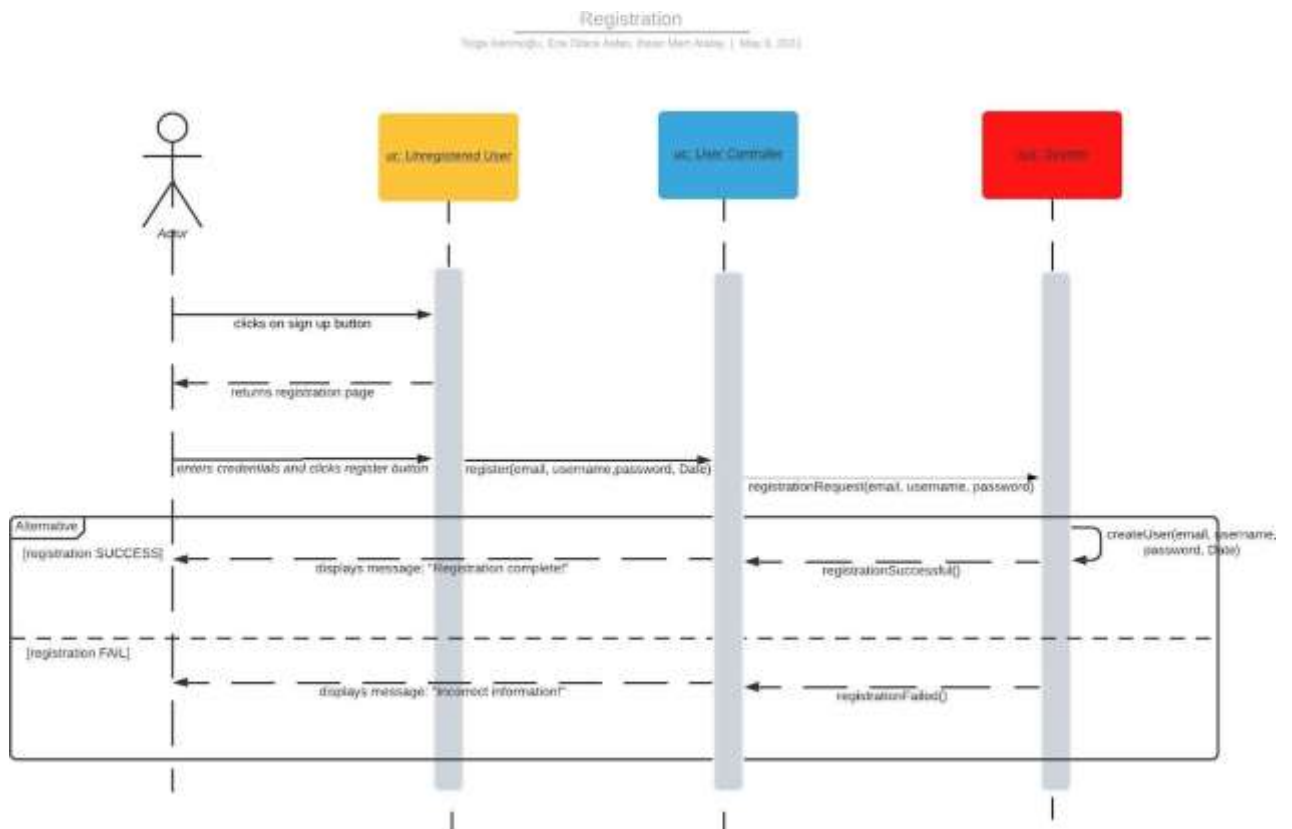

Class Diagram

Sequence Diagrams

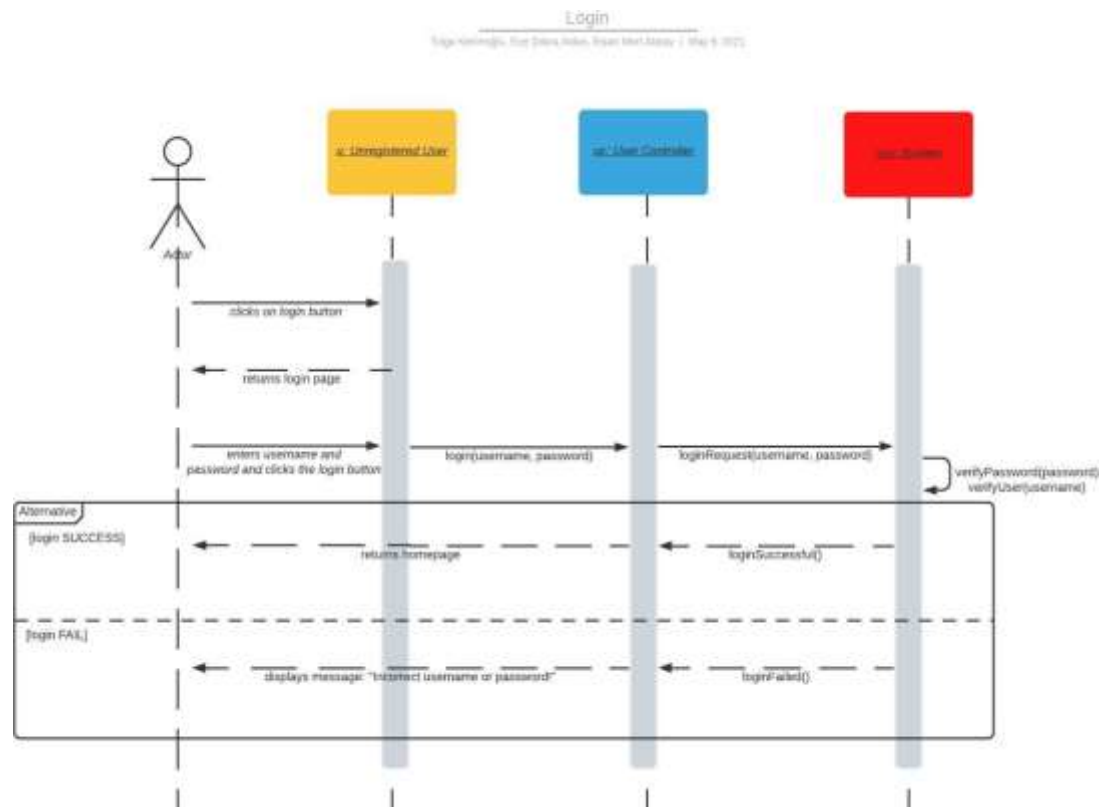

1. Registration

Shows the sequence of interactions between associated objects while a user registers to the system from the homepage.

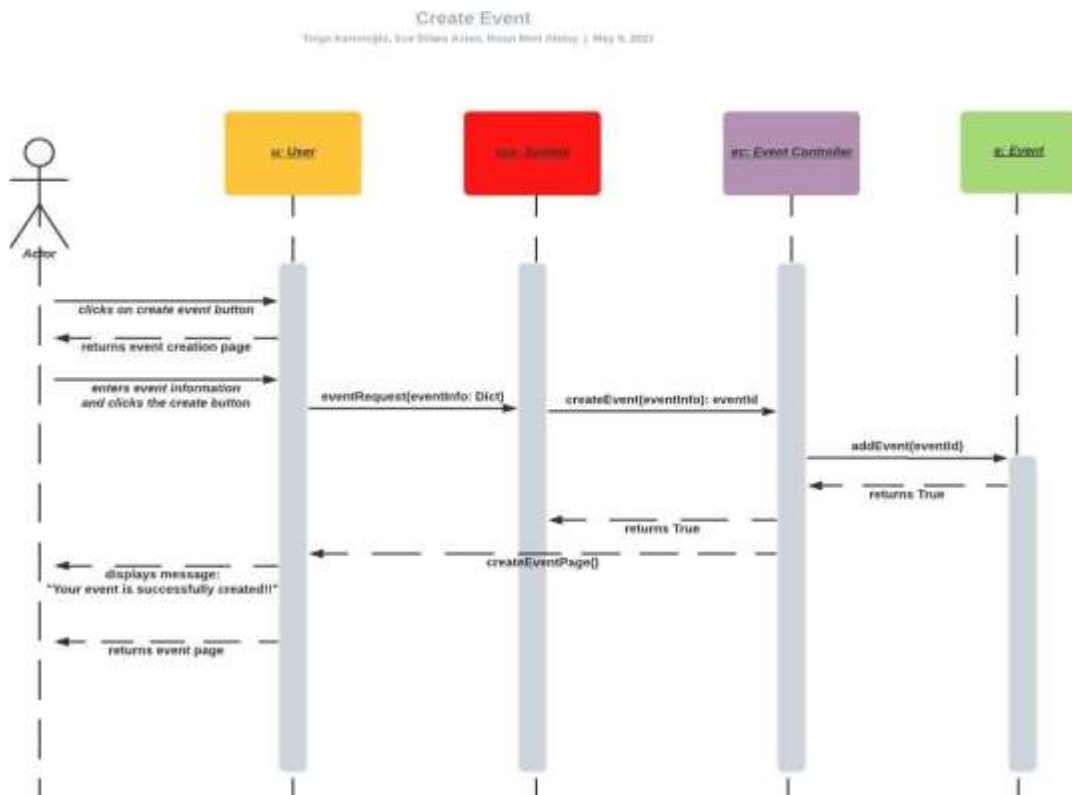

2. Login

Shows the sequence of interactions between associated objects while a user logs in to his/her account from the homepage.

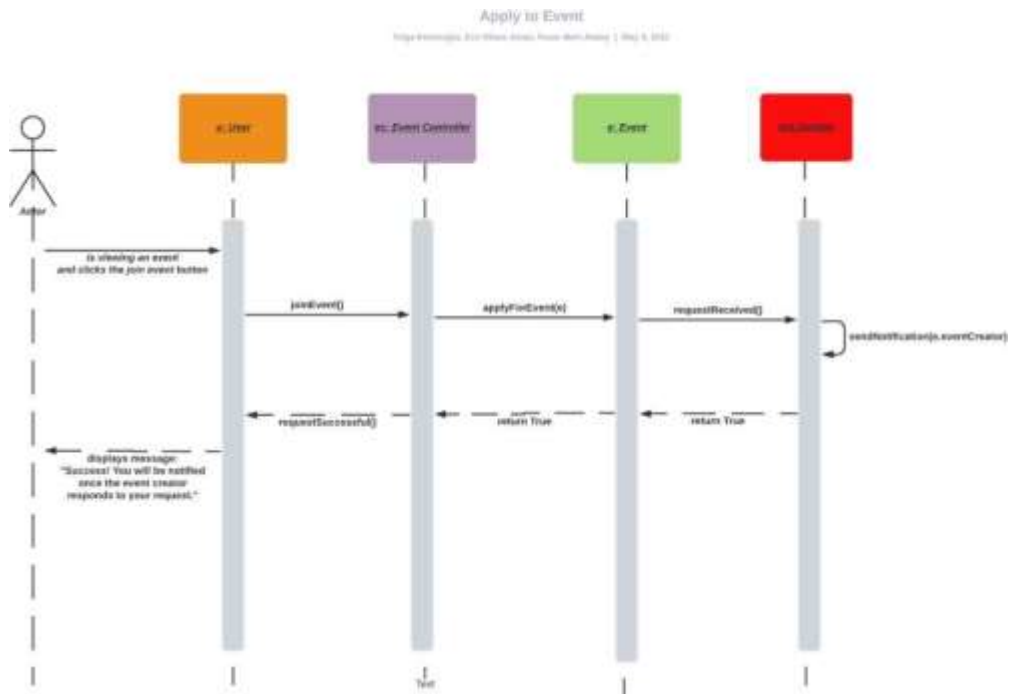

3. Create Event

Shows the sequence of interactions between associated objects while a user creates an event where he/she had already logged in and is in the homepage.

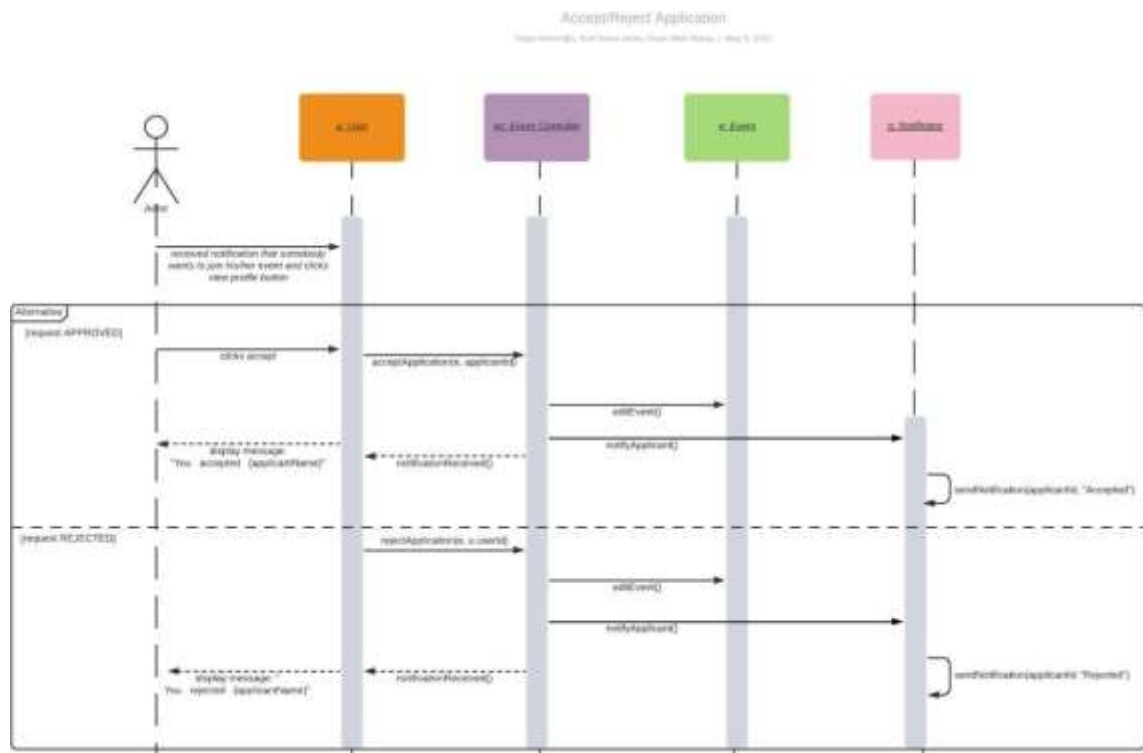

4. Apply to event

Shows the sequence of interactions between associated objects when a user applies to join to an event.

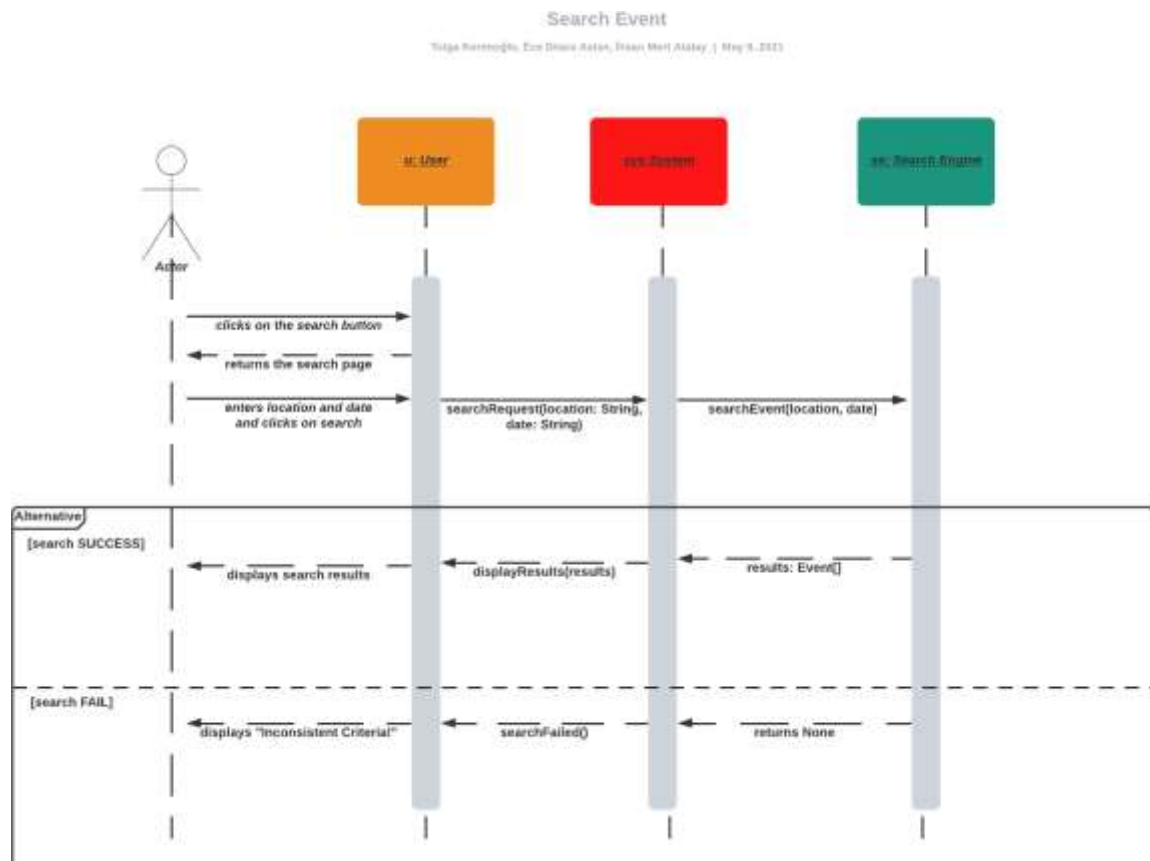

5. Accept/Reject Applicant

Shows the sequence of interactions between associated objects when a user accepts/rejects a user to an event he/she created.

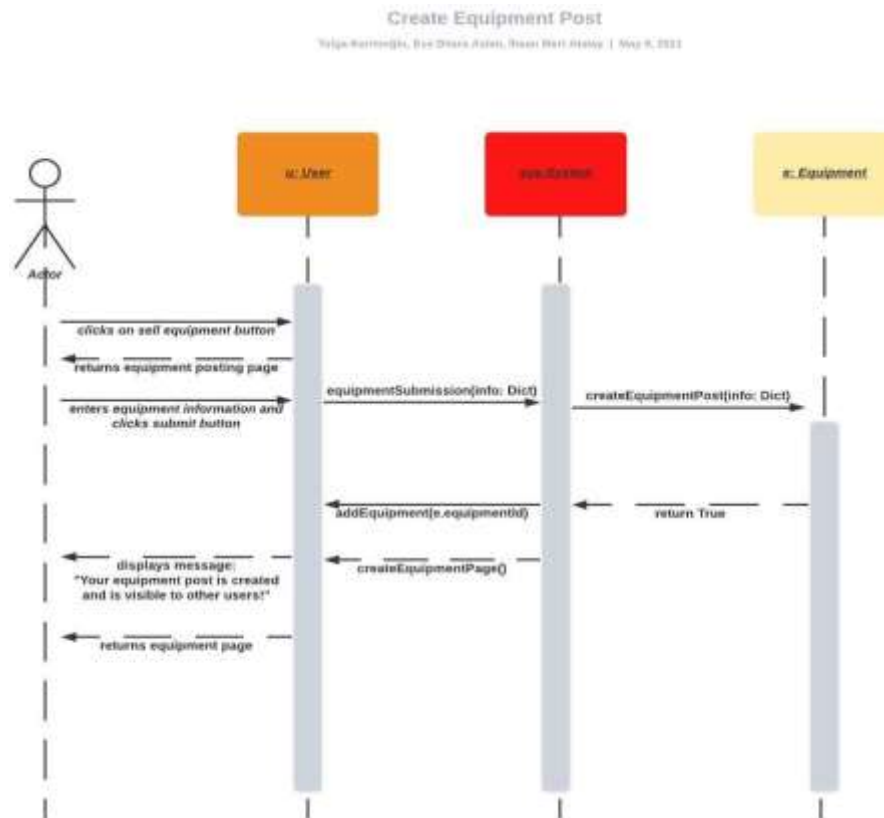

6. Search Event

Shows the sequence of interactions between associated objects while a user searches for an event by location and date after he/she has already logged in.

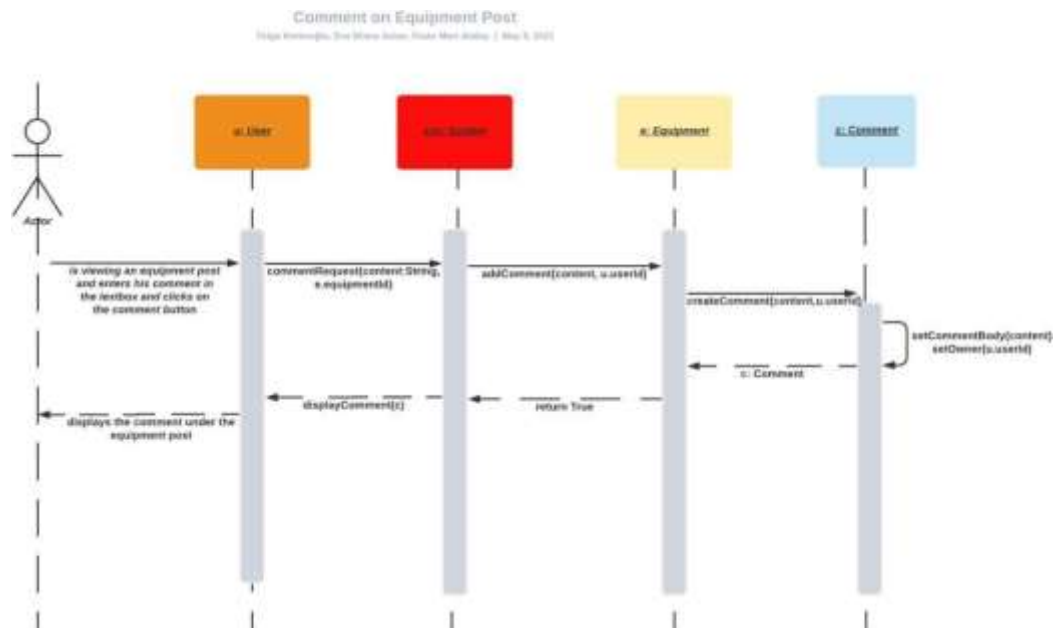

7. Create Equipment Post

Shows the sequence of interactions between associated objects while a user creates an equipment post to sell equipment after he/she has already logged in.

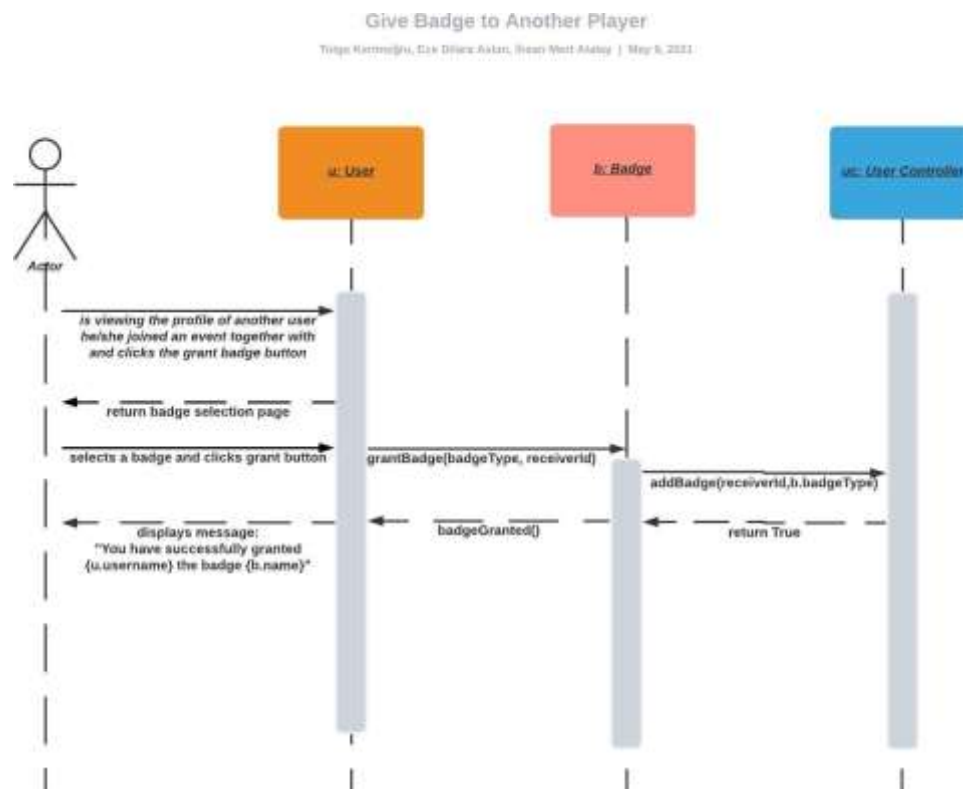

8. Comment on Equipment

Shows the sequence of interactions between associated objects when a user submits a comment for an equipment while he/she is already viewing the equipments post.

9. Give Badge to Another Player

Shows the sequence of interactions between associated objects when a user gives a badge to another user he/she has joined an event together with while he/she is already viewing the users profile.

Scenarios and Mockups

Scenario 1 & Mockup

User and Their Persona

- Ayşen Gruda
- 28 years old
- Lives in Etiler, Istanbul
- Currently an economist working for an investment company.
- Has been playing tennis for a while.

Story

Ayşen serves as an accountant for big firms to direct their investments. She's been playing tennis for some time, but all her friends are busy like her and they can share no common time to enjoy group activities. That's why she downloaded our application a while ago, and now she intends to find an opponent to play a 1v1 tennis match.

Preconditions

- Ayşen is a registered user in the system.
- Ayşen is already logged in.

Goals

- Ayşen generally wants a consistent supply of tennis opponents.
- Ayşen initially wants to join a person for a tennis match.

Actions

1. She opens the app and clicks 'Search' on the homepage.
2. She selects the sport type "tennis" from the options provided.
3. She enters the location, and specifies a range of date and time in the form displayed. Clicks "find".
4. She receives a list of tennis players organising a match, corresponding dates and locations.
5. She picks a tennis match she likes and visits the event page. Likes the event and clicks "apply".
6. After some time, she receives notifications informing their opponent accepted their application or the event time coming close.

Acceptance Criteria

- 3.1.2.3.1 The system shall provide information about the events such as event name, location, date, sport and the number of players.
- 3.1.1.5.3 User shall be able to apply to participate in or spectate an event.
- 3.1.2.3.3 The system shall allow users to request joining an event.
- 3.1.1.5.4 User shall be informed on whether he/she was accepted to the event.
- 3.1.2.5.2 The system shall send notifications to users who are selected or not selected for a specific event.

Web Mockup

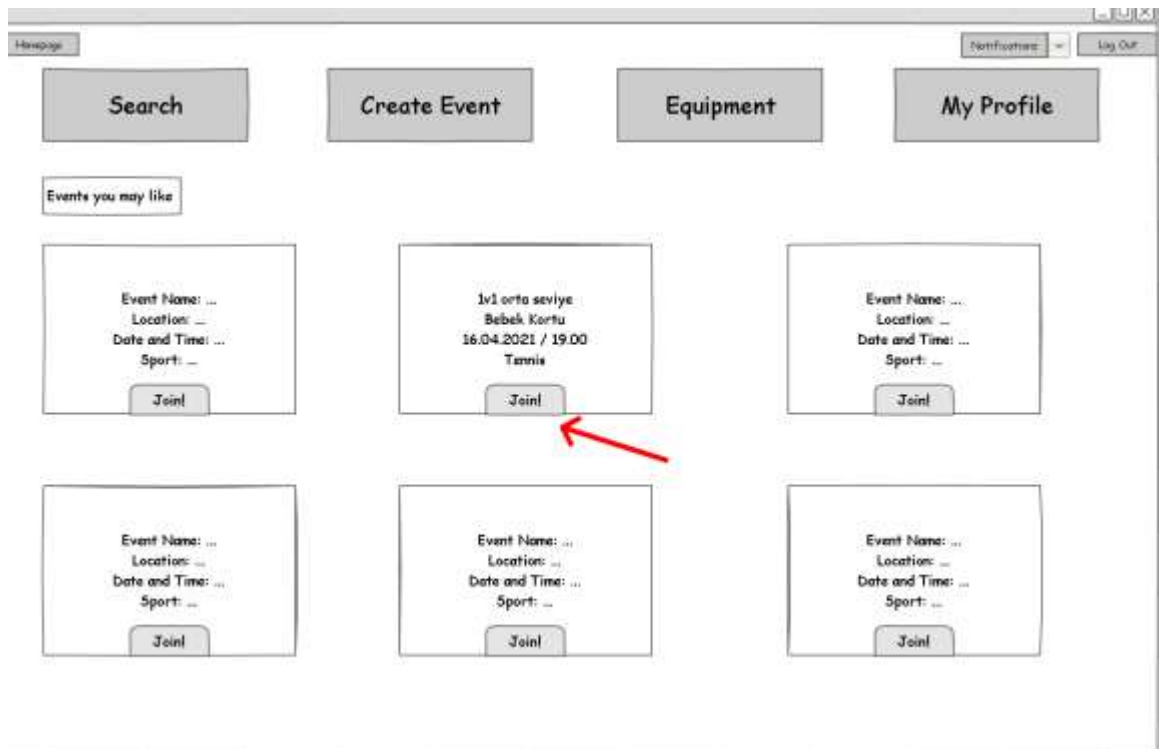

1. She opens the app and clicks 'Search' on the homepage.

The mockup shows a web browser window with a title bar. Inside, there's a header with a 'Homepage' tab, a 'Notifications' dropdown, and a 'Log Out' button. Below the header are four main buttons: 'Search', 'Create Event', 'Equipment', and 'My Profile'. A red arrow points to the 'Search' button. Below these buttons is a section titled 'Events you may like' which contains a 2x3 grid of event cards. Each card has fields for 'Event Name: ...', 'Location: ...', 'Date and Time: ...', 'Sport: ...', and a 'Join!' button.

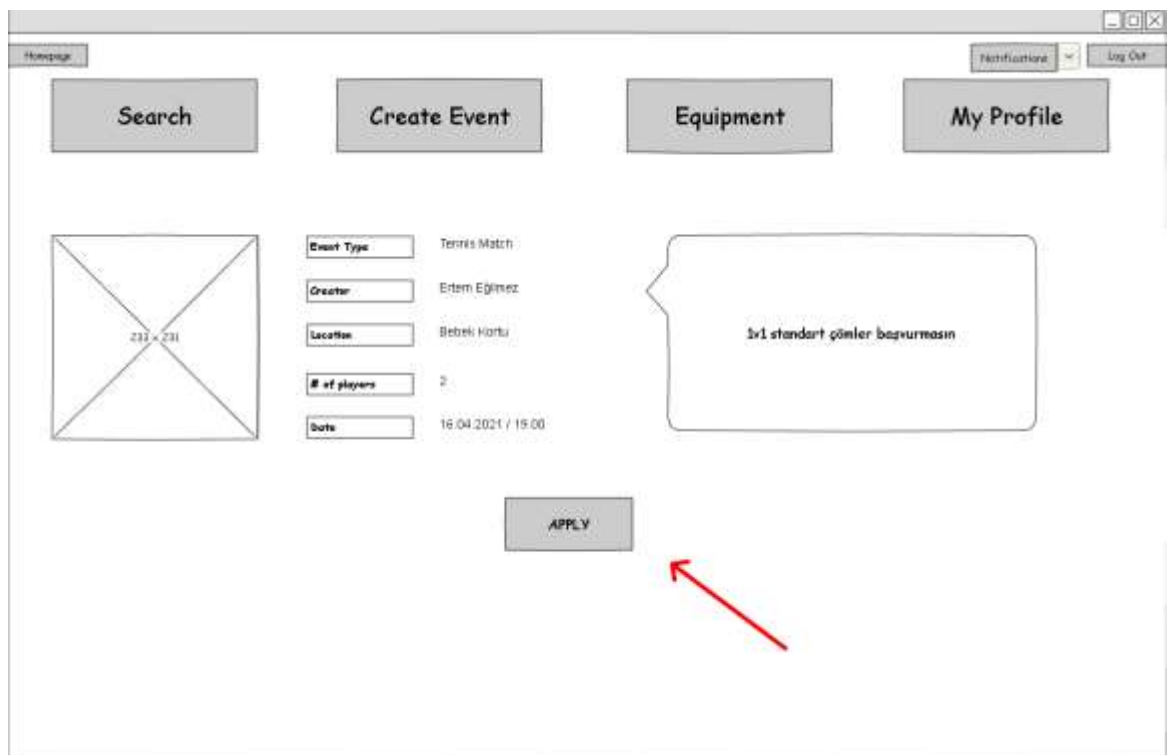

2. She selects the sport type "tennis" from the options provided.
3. She enters the location, and specifies a range of date and time in the form displayed. Clicks "find".

The mockup shows the search form. At the top is a 'Search an Event' label. Below it are three input fields: 'Sport Type' with a dropdown menu showing 'Tennis', 'Location' with a text input containing 'Bdr', and 'Date From' and 'To' with date pickers. The 'Date From' picker shows '2021-04-15' and the 'To' picker shows '2021-04-20'. At the bottom is a 'Find' button, which is pointed to by a red arrow.

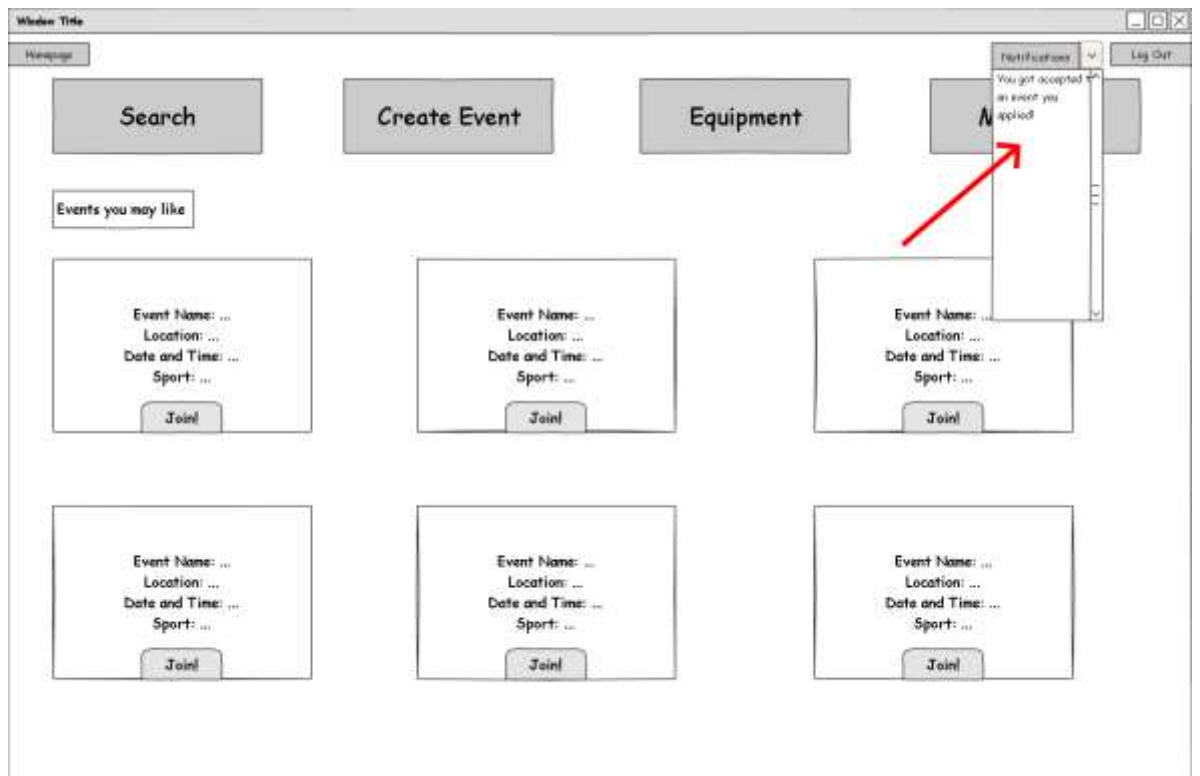

4. She receives a list of tennis players organising a match, corresponding dates and locations.

5. She picks a tennis match she likes and visits the event page. Likes the event and clicks "apply"

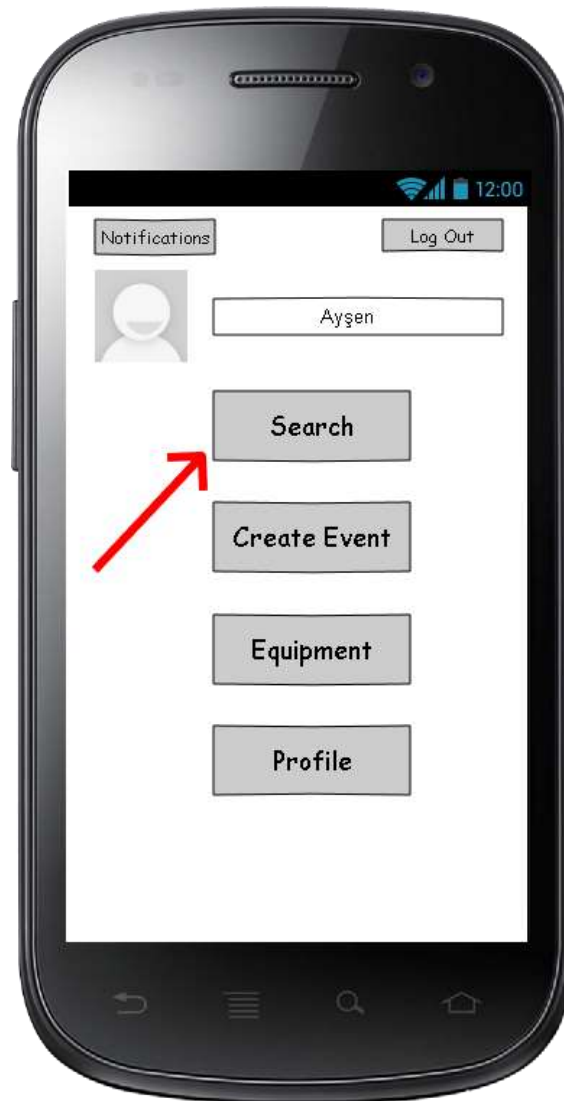

6. After some time, she receives notifications informing their opponent accepted their application or the event time coming close.

Android Mockup

1. She opens the app and clicks 'Search' on the homepage.

2. She selects the sport type "tennis" from the options provided.

3. She enters the location, and specifies a range of date and time in the form displayed. Clicks "find".

4. She receives a list of tennis players organising a match, corresponding dates and locations.

5. She picks a tennis match she likes and visits the event page. Likes the event and clicks "apply".

6. After some time, she receives notifications informing their opponent accepted their application or the event time coming close.

Scenario 2 & Mockup

User and Their Persona

- Hasan
- 32 years old
- Lives in Etiler, Istanbul
- Currently a software engineer working at a big finance firm
- Likes to play soccer

Story

Hasan is a software engineer, waiting for his next promotion. He's a fairly social person, likes to have fun and exercise to get rid of the stress of his worklife. He has discovered our website/application a few months back when one of his friends recommended. He has joined a couple soccer games in his neighborhood, and now he wants to organize his own game.

Preconditions

- Hasan is a registered user in the system.
- Hasan is already logged in.

Goals

- He wants to organize a soccer game in the local soccer field near his house.
- He wants to have a 5 vs. 5 game, so he needs to find 9 other players.

Actions

1. Hasan is in the application homepage and clicks the button for event creation.
2. In the event creation page he types in the event name.
3. He selects the sport type as soccer from the default options provided.
4. He enters the location, number of players, date and time in the form displayed.
5. He clicks the "complete" button.
6. He receives a pop-up which states that event creation is successful, he leaves the website/application.
7. He checks his notifications from time to time to see who have applied to join the game.
8. He views the profile of the user and either accepts or rejects the user to his game by clicking on the corresponding buttons.
9. He does 7-8 until there are enough players for the game.

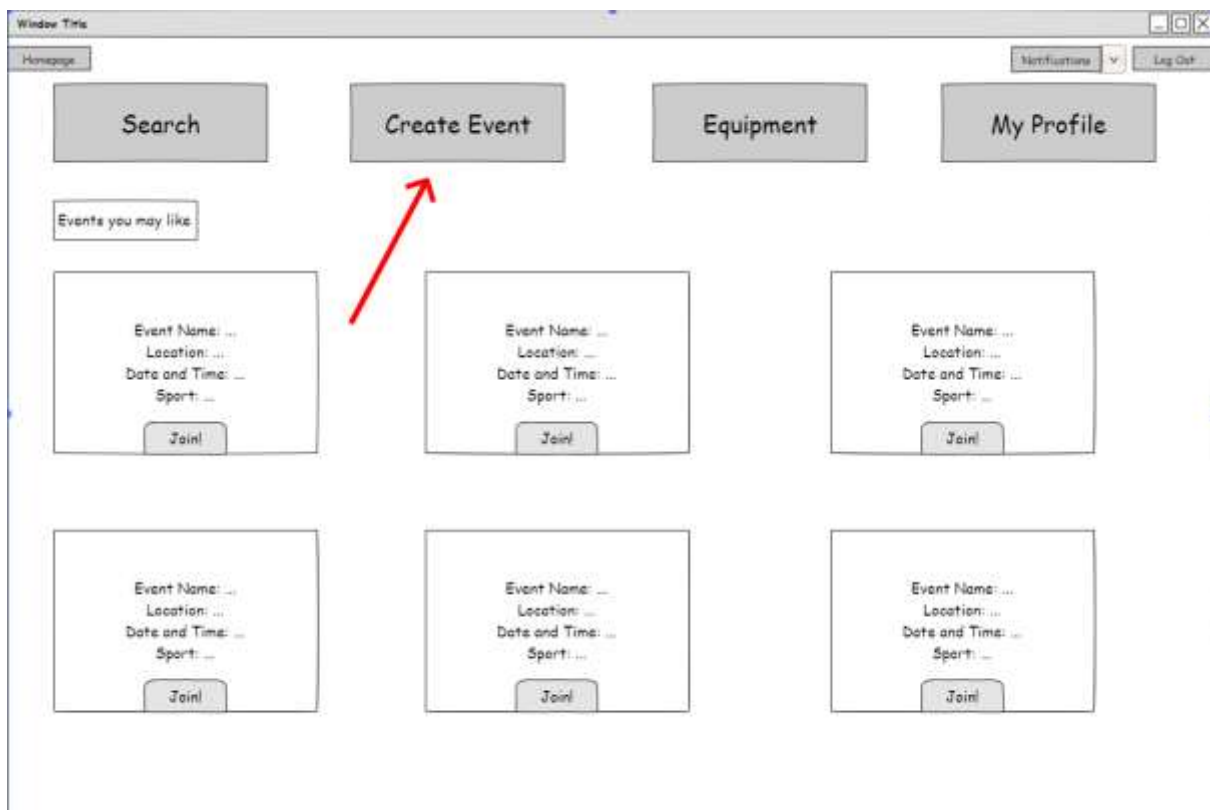

Acceptance Criteria

- 3.1.1.4.1 Any user shall be able to create events.
- 3.1.2.3.4 The system shall allow users to create events by specifying event name, location, date and sport and the number of players.
- 3.1.2.3.5 The system shall provide default sport types for the event creators to select from.
- 3.1.2.3.7 The system shall send a pop-up message after a user creates an event.

- 3.1.2.5.1 The system shall send notifications to event creators when a user sends a request to one of their events.
- 3.1.1.4.5 Event creator shall be able to check the appliers' badges or related information for whether to accept them or not.

Web Mockup

1. Hasan is in the application homepage and clicks the button for event creation.

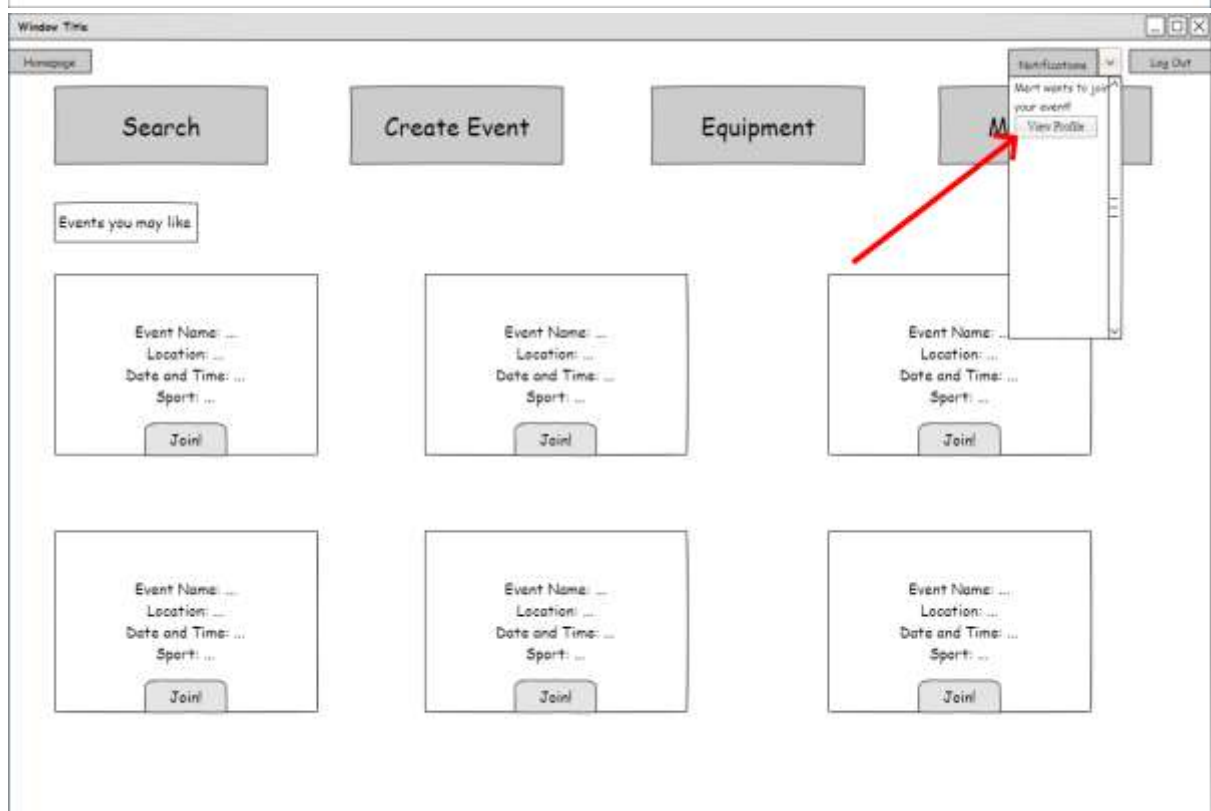

2. In the event creation page he types in the event name.
3. He selects the sport type as soccer from the default options provided.
4. He enters the number of players, location, date and time in the form displayed.
5. He clicks the "complete" button.

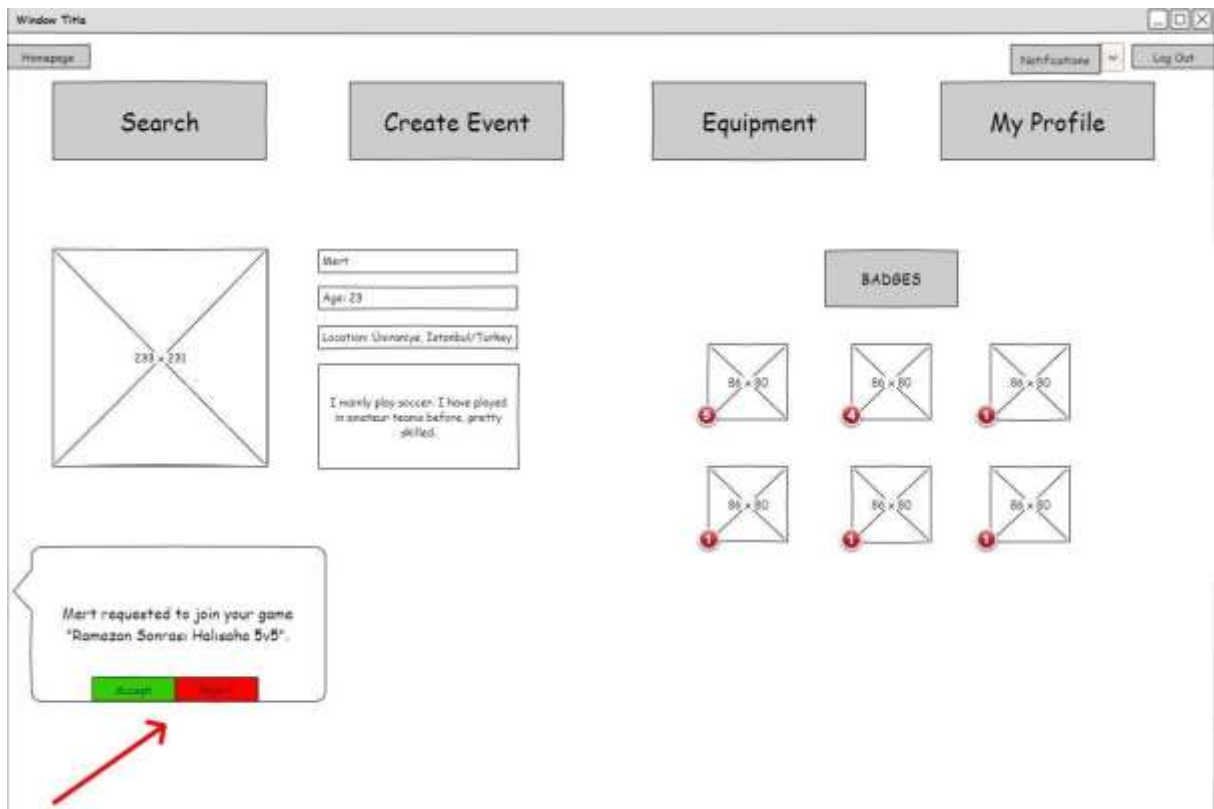

The screenshot shows a web application interface with a header bar containing 'Homepage', 'Notifications', and 'Log Out' buttons. Below the header, there are four main navigation buttons: 'Search', 'Create Event', 'Equipment', and 'My Profile'. The 'Create Event' button is highlighted. Below it, a form titled 'Create your event!' is displayed. The form contains the following fields: 'Event Name' (text input with 'Ramazan Sennasi Halisaha 5v5'), 'Sport Type' (dropdown menu with 'Soccer'), 'Number of Players' (text input with '9'), 'Location' (text input with 'Stop Halisaha, Etiler, Istanbul, Turkey'), 'Date' (date picker with '2021-05-17'), and 'Time' (time picker with '21:00'). Below these fields is a text area labeled 'Sadece profil:' and a 'Complete' button. A red arrow points to the 'Complete' button.

6. He receives a pop-up which states that event creation is successful, he leaves the website/application.

The screenshot shows the same web application interface as before, but with a large gray pop-up box in the center. The pop-up contains the following text: 'Successful! Your event is now created and visible to other users. You will be notified when somebody requests to join your event, have fun!'. The background interface remains the same, with the 'Create Event' button still highlighted.

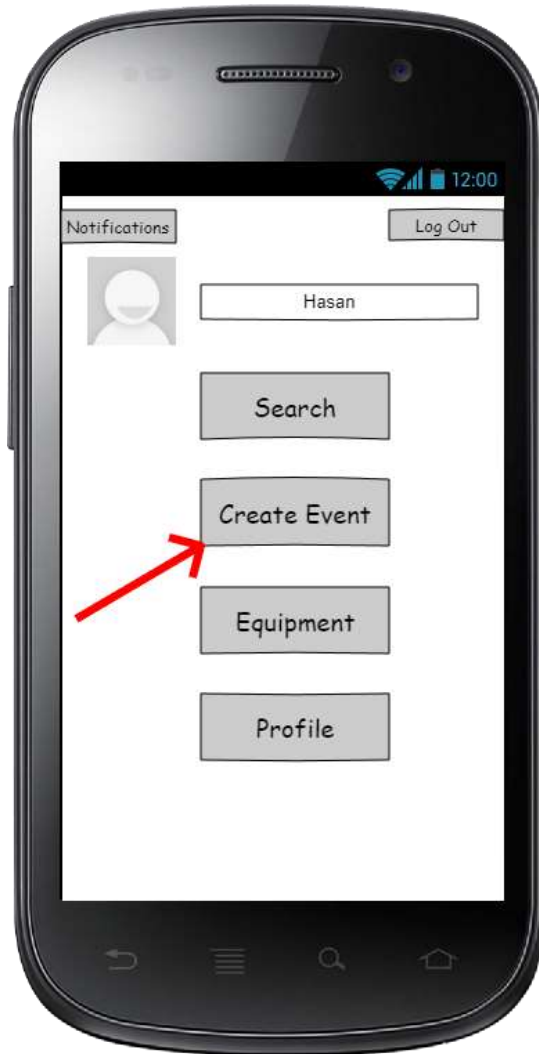

7. He checks his notifications from time to time to see who have applied to join the game.

Android Mockup

1. Hasan is in the application homepage and clicks the button for event creation.

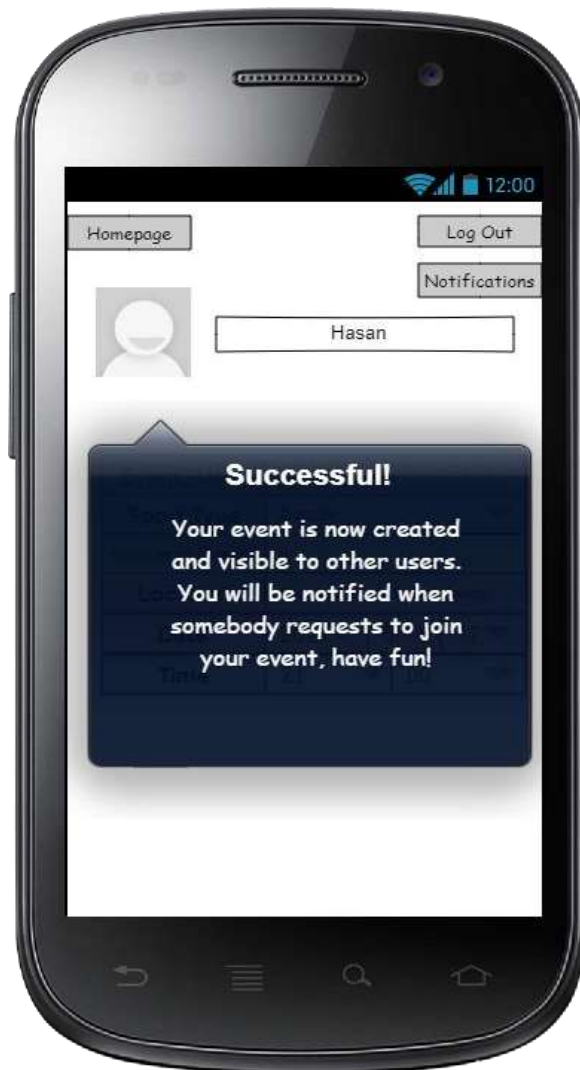

2. In the event creation page he types in the event name.
3. He selects the sport type as soccer from the default options provided.
4. He enters the number of players, location, date and time in the form displayed.

5. He clicks the "complete" button.

6. He receives a pop-up which states that event creation is successful, he leaves the website/application.

7. He checks his notifications from time to time to see who have applied to join the game.

8. He views the profile of the user and either accepts or rejects the user to his game by clicking on the corresponding buttons.

Scenario 3 & Mockup

User and Their Persona

- Ferit Şahin
- 22 years old
- Lives in Levent, Istanbul
- Currently a senior computer engineering student at Boğaziçi University
- Likes to ski and participate in community events

Story

Ferit enjoys skiing and he joined the university's ski club in the first year of college. He goes to ski resorts with his friends on holidays. He wants to ski in Uludağ with his friends in the next semester. But he needs to buy a new snowboard because his old one is broken. While wandering around campus, he saw our ads on the wall and it seems interesting to him. Then he visited our site by reading the QR code in the ad and registered our website.

Precondition

- Ferit is a registered user of our website and logged in.
- He has already given his location information.

Goals

- Ferit wants to go to the ski event he signed up to on our website.
- He wants to buy a snowboard for this event.

Actions

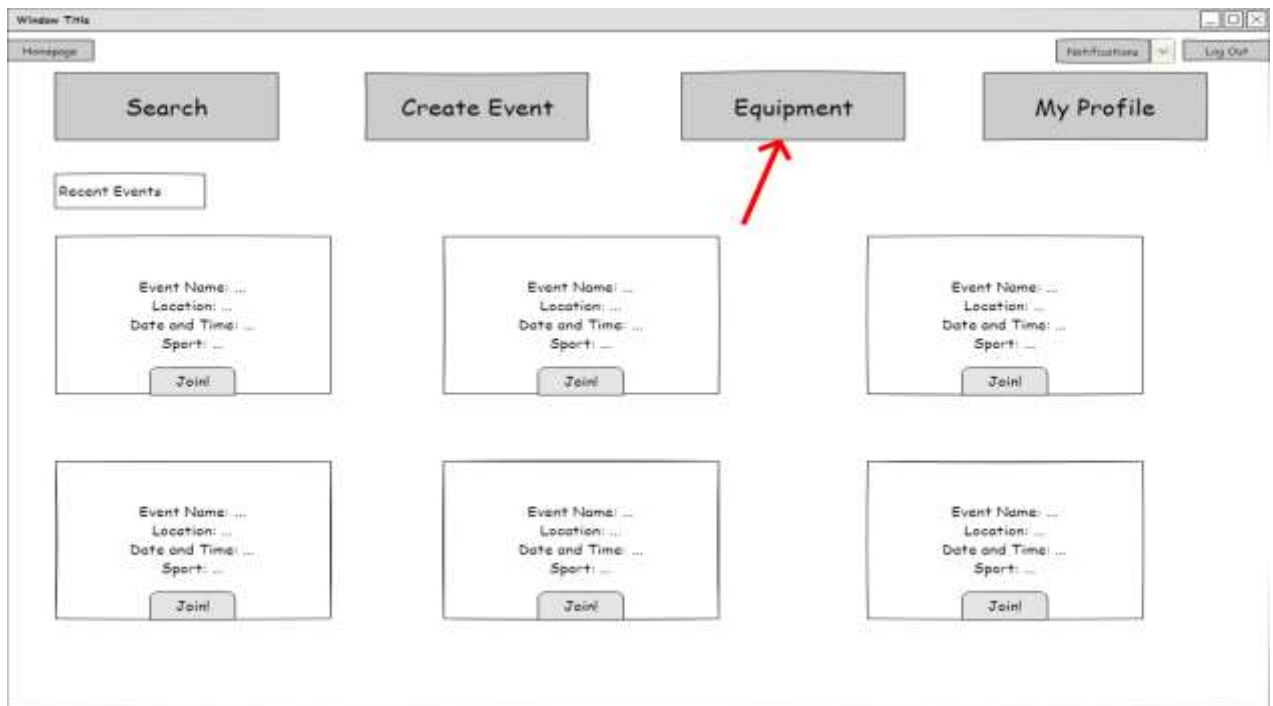

1. Ferit visits our application homepage 'bounswe_2021springgroup4.com'.
2. He clicks on 'Equipment' on the home page.
3. He clicks on 'Find Equipment' on 'Equipment' page.
4. He clicks on 'Skiing' on 'Sport Category' page
5. He sees several types of skiing equipment like snowboards, helmets, gloves, etc.
6. He clicks on 'Snowboard' from the types.
7. He sees various Snowboard equipment post pages (their photo, title, etc.) on this page. Then he chooses 'Google Map' option to filter the results.
8. Snowboard equipment posts that only selected area on the map are visible on this page. He chooses one of them and clicks on link.
9. He now sees the equipment page. In this page, he could see equipment photos, equipment description, comment and give a badge to the seller.

Acceptance Criteria

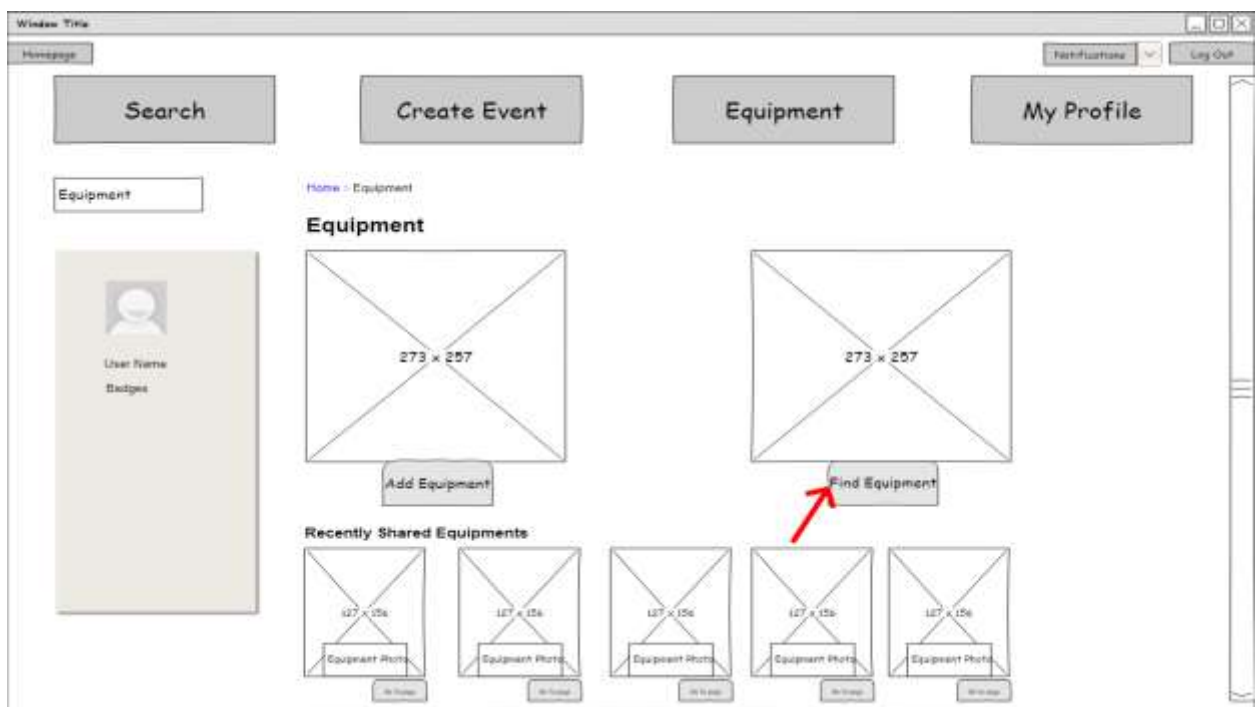

- 3.1.1.6.1 User shall be able to search for equipment sales by sport and location.
- 3.1.1.6.2 User shall be able to check information of equipment sellers and read descriptions written by them.
- 3.1.2.4.3 The system shall recommend sport-related content (gadgets, clothing, tools, merchandise) to users for the sports they are interested in.

Web Mockup

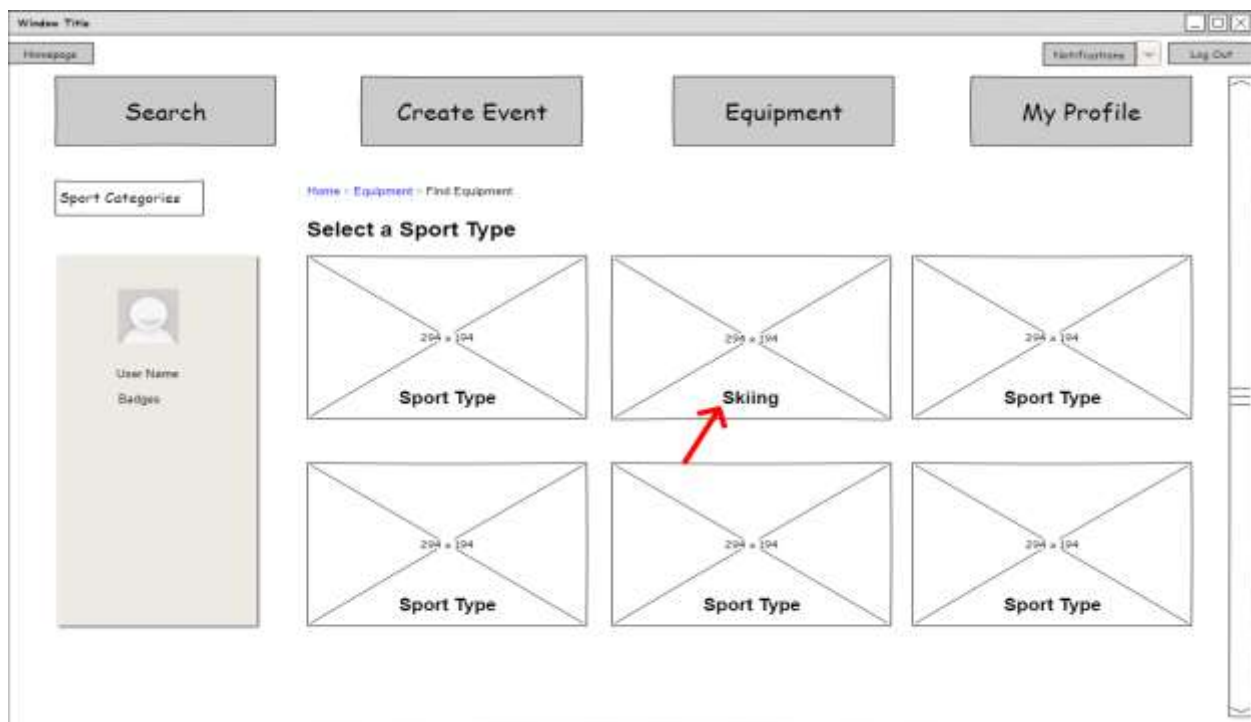

1. Ferit visits our application homepage 'bounswe_2021springgroup4.com'.
2. He clicks on 'Equipment' on the homepage.

3. He clicks on 'Find Equipment' on the 'Equipment' page.

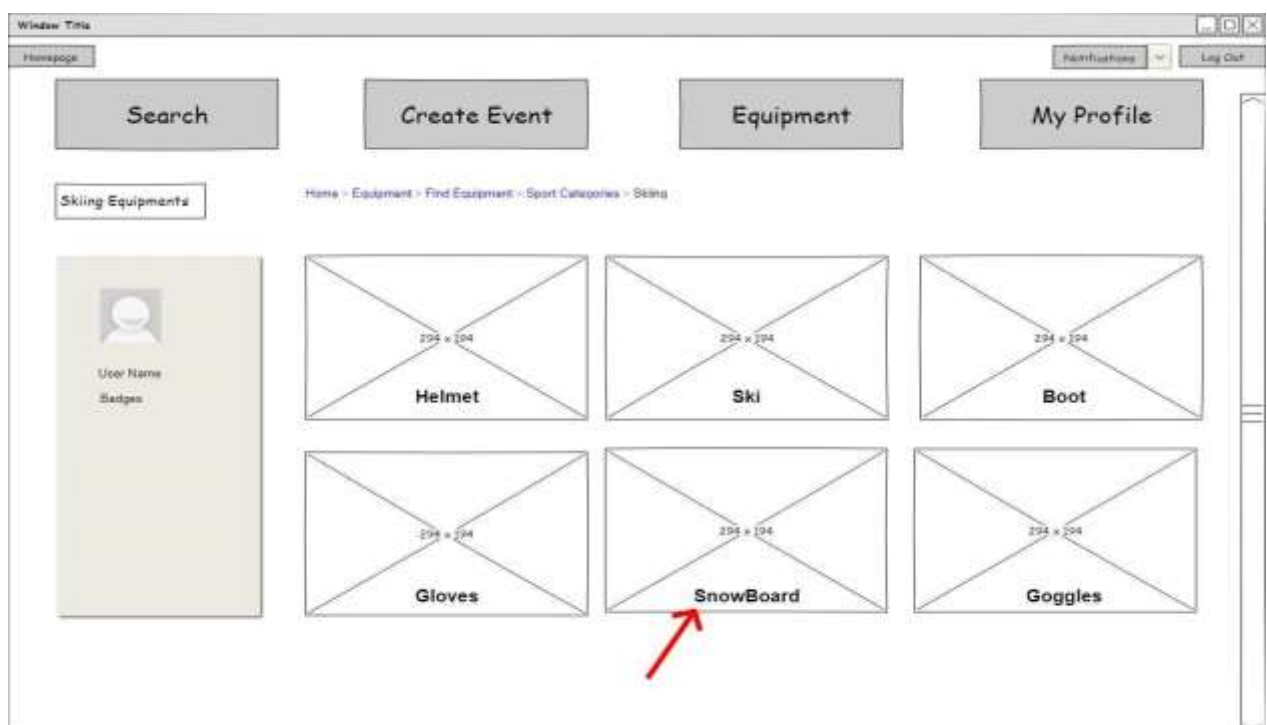

4. He clicks on 'Skiing' on the 'Sport Categories' page.

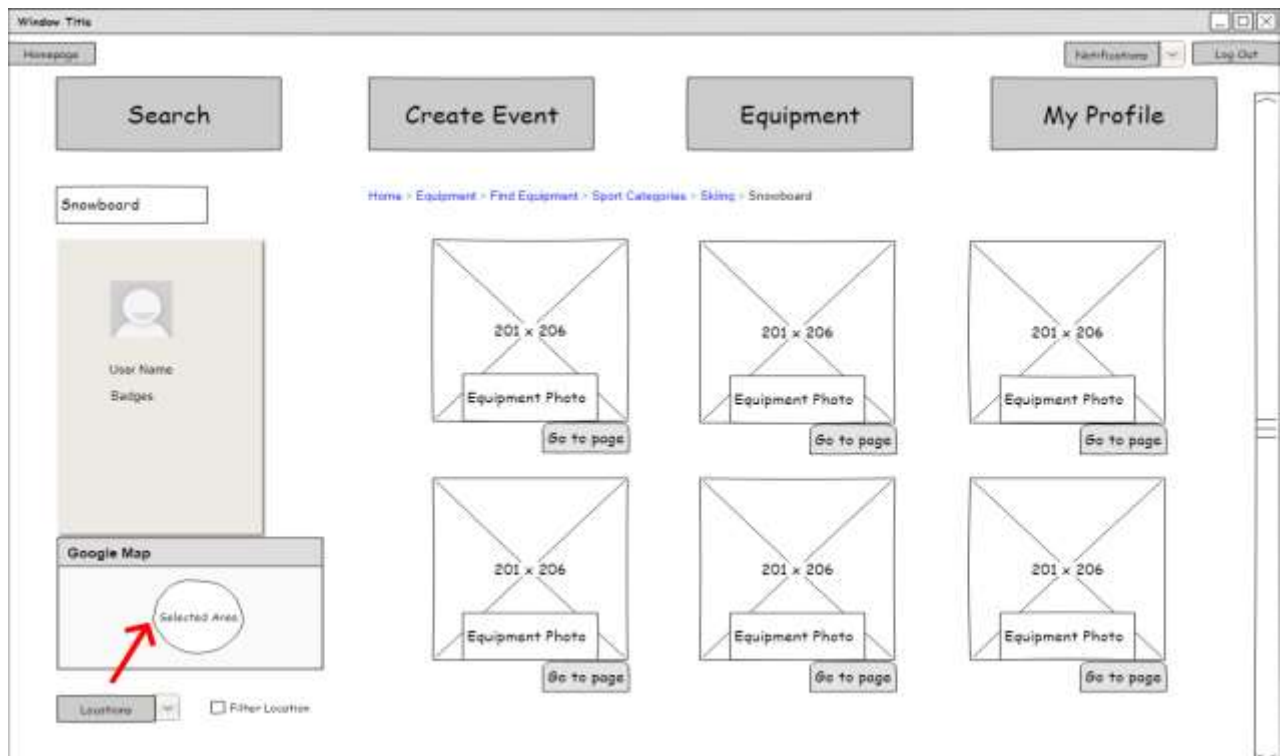

5. He sees several types of skiing equipment like snowboards, helmets, gloves, etc.

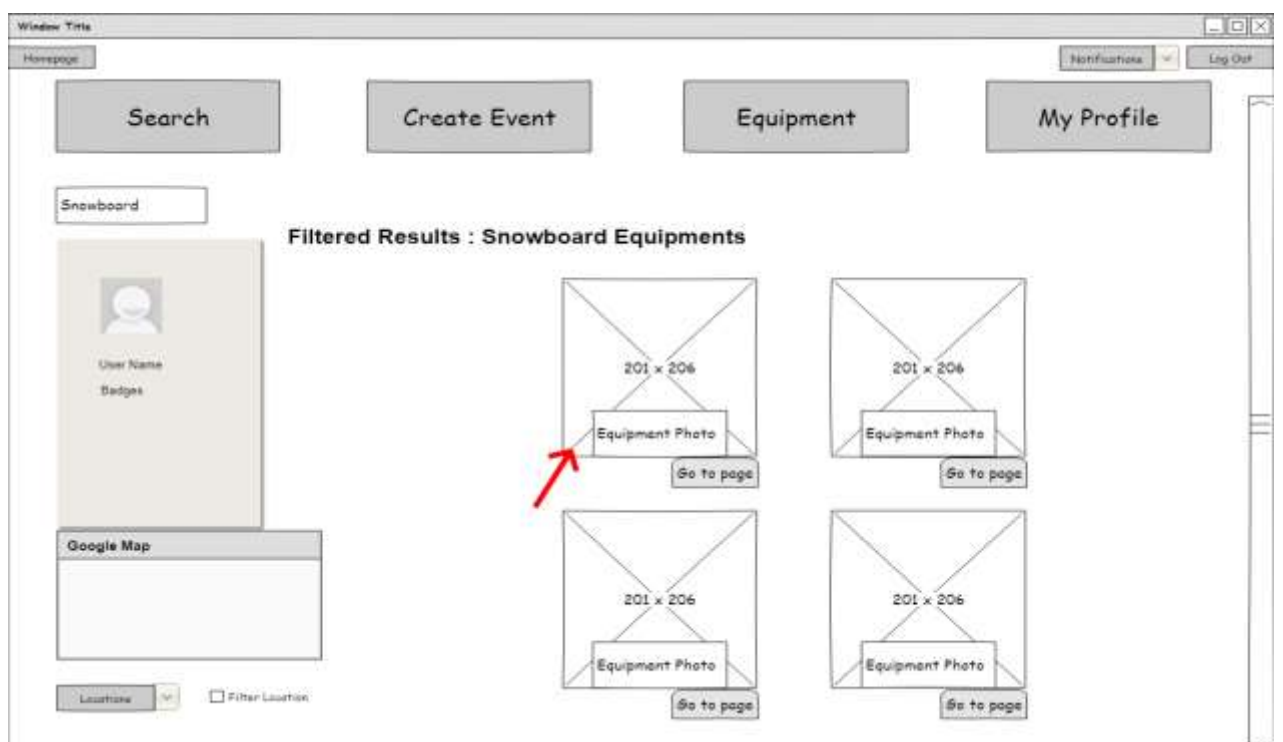

6. He clicks on 'Snowboard' from the types.

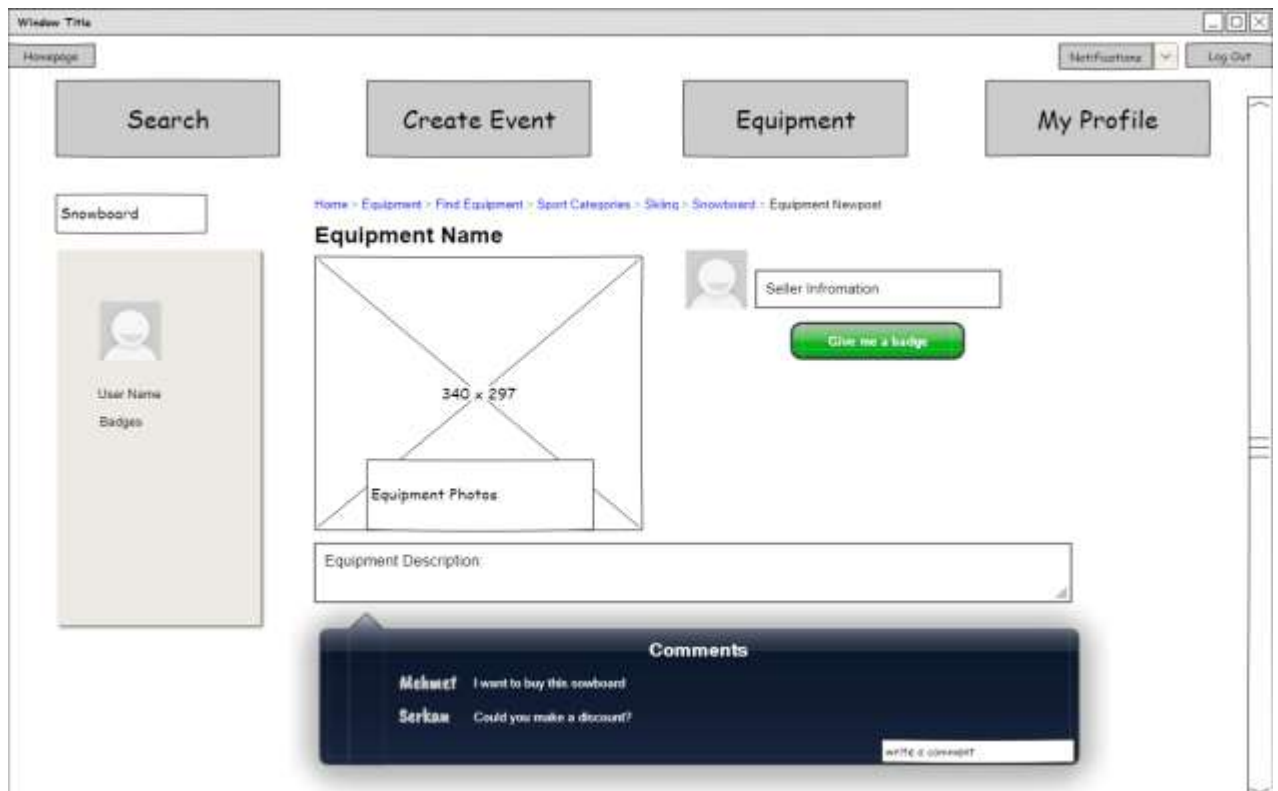

7. He sees various snowboard equipment posts (their photo, title, etc.) on this page. Then he clicks the 'Select Location' option to filter the results.

8. Snowboard equipment posts from the selected area on the map are visible on this page. He chooses one of them and clicks on their link.

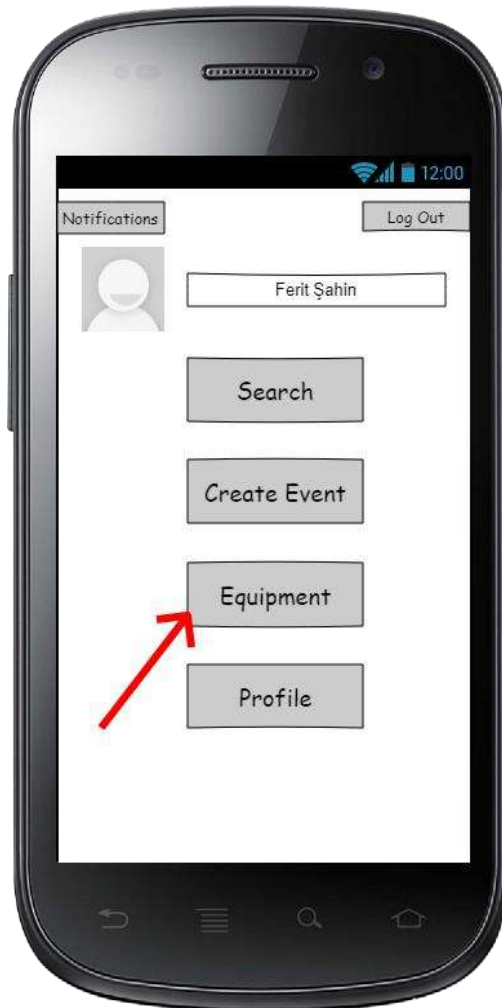

9. He now sees the post. In this page, he can see photos and a description, comment and give a badge to the seller.

Android Mockup

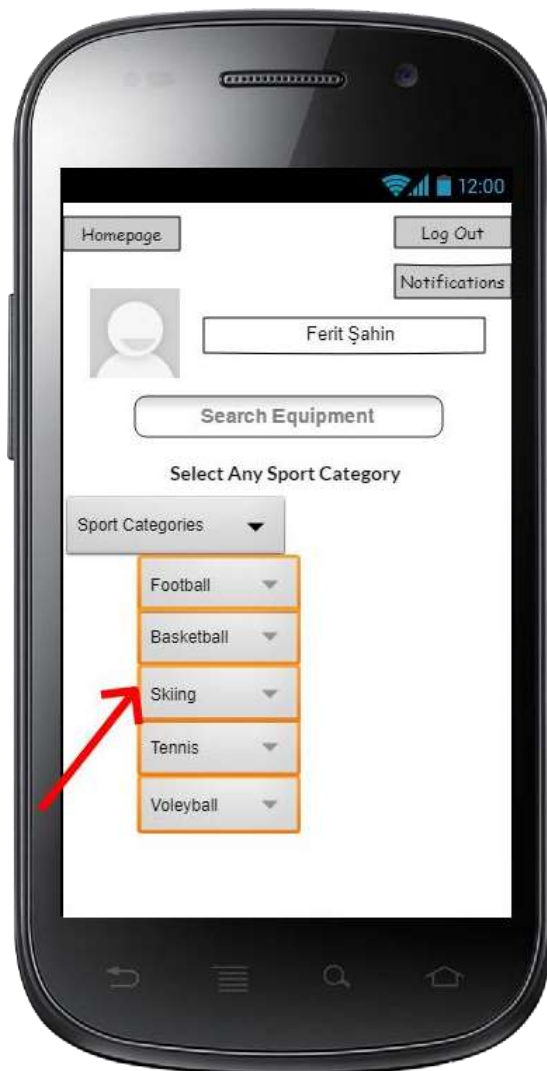

1. Ferit downloaded our application, and is a registered user of our app. He opens the application from his phone. He sees the homepage.
2. He clicks on 'Equipment' on the homepage.

3. He clicks on 'Find Equipment' on the 'Equipment' page.

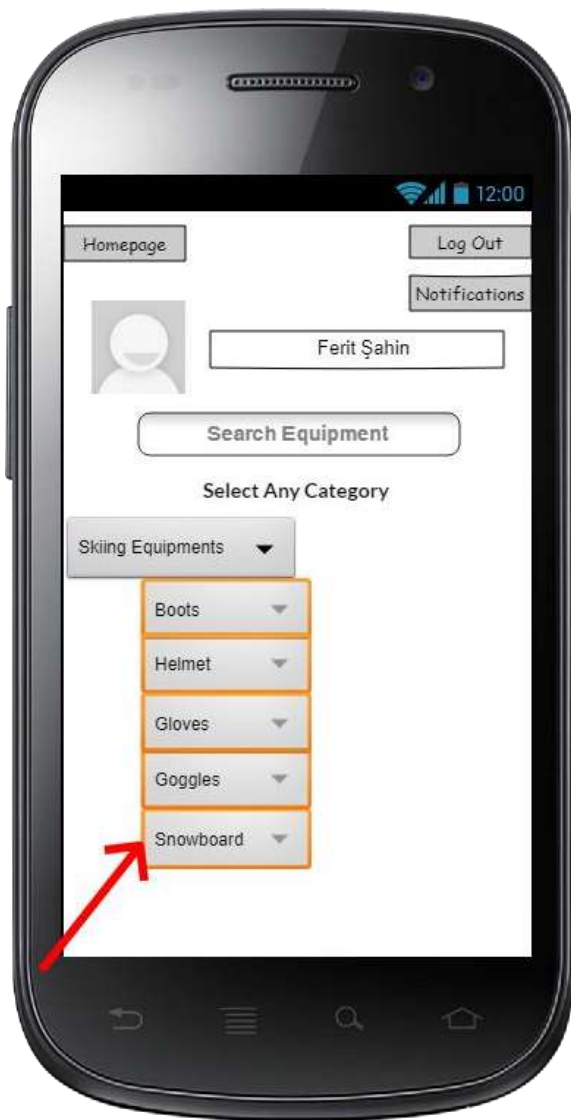

4. He clicks on 'Skiing' on the 'Sport Categories' page.

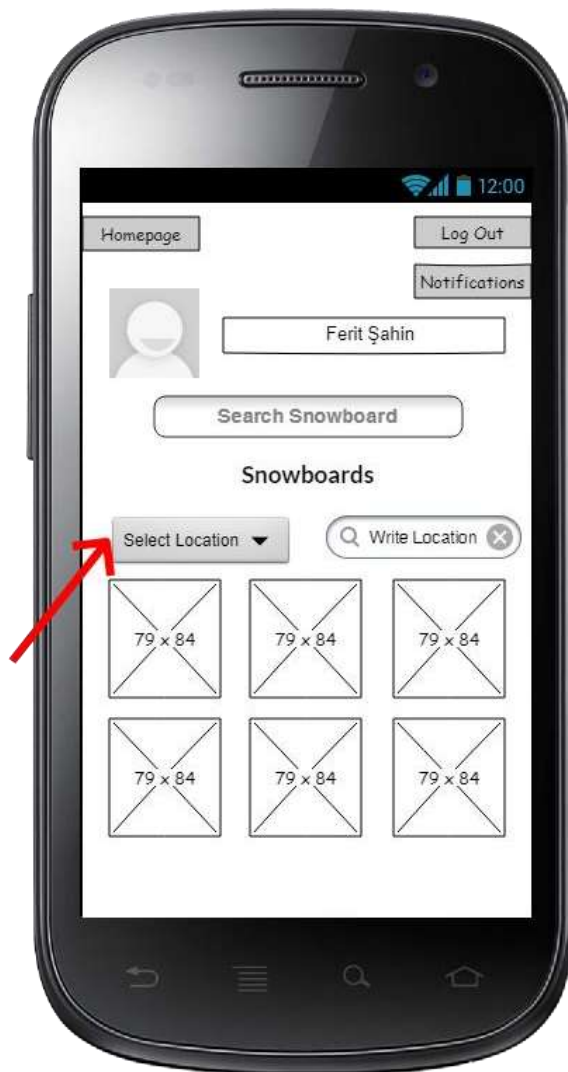

5. He sees several types of skiing equipment like snowboards, helmets, gloves, etc.

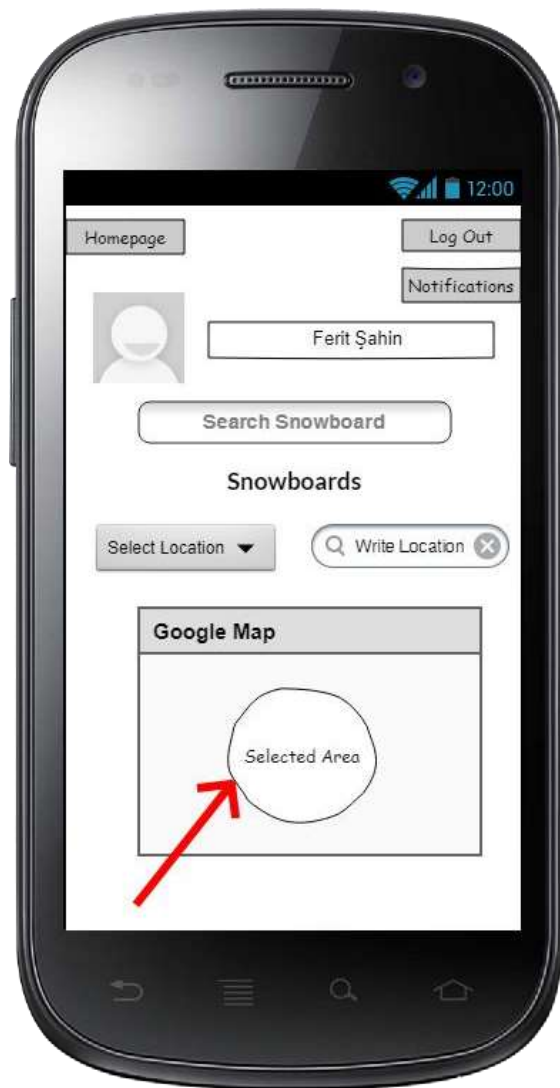

6. He clicks on 'Snowboard' from the category.

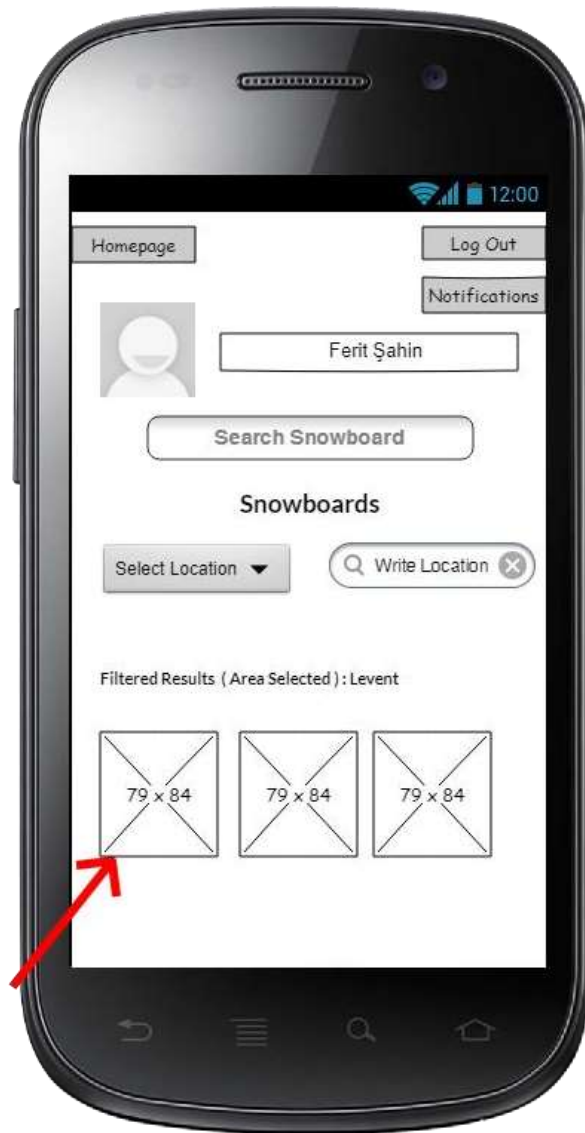

7. He sees various snowboard equipment posts (their photo, title, etc.) on this page. Then he clicks the 'Select Location' option to filter the results.

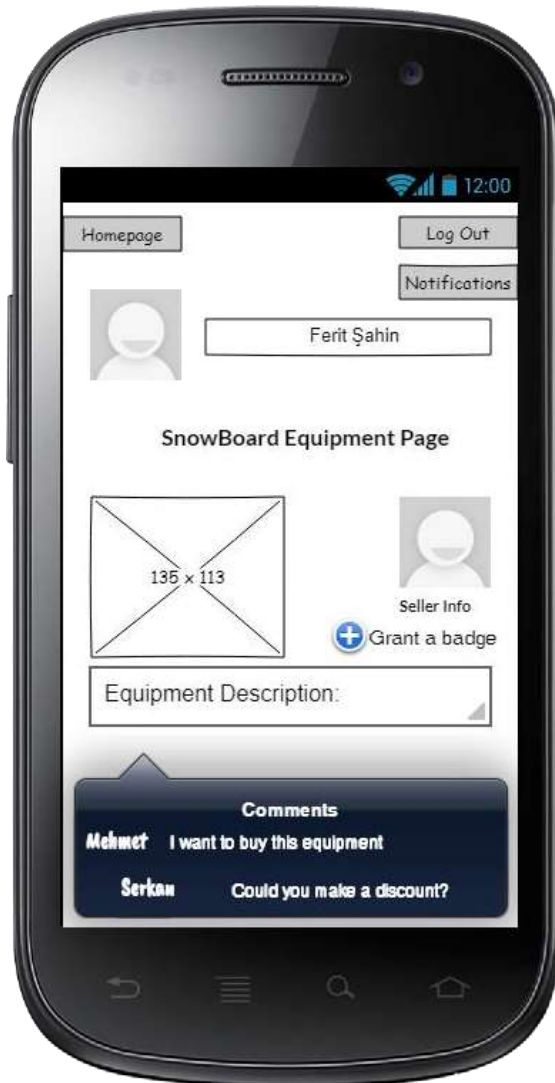

7.a. He selects an area on the map.

8. Snowboard equipment posts from the selected area on the map are visible on this page. He chooses one of them and clicks on their link.

9. He now sees the post. In this page, he can see photos and a description, comment and give a badge to the seller

Login Page

- Registered users login by filling username, password fields and clicking login button.
- User can go to the register page by clicking I don't have an account button.

A mobile application login screen. At the top is a purple header with the word "Login" in white. Below the header, the background is white. There are two input fields: "Username" with a light blue underline and "Password" with a light grey underline. Below these fields is a green rectangular button with the word "LOGIN" in white capital letters. Underneath the login button is a reddish-brown rectangular button with the text "I DON'T HAVE AN ACCOUNT" in black capital letters. At the bottom of the screen is a black navigation bar containing three white icons: a back arrow, a circle, and a square. On the far right of the navigation bar is a small grey square button with a white plus sign.

List Event Page

- Users view all of the events after login.
